May 2017 PRE-ORDER LIST

[www.facebook.com/orchidphile](http://www.facebook.com/orchidphile)  
(203) 329-7255

**IMPORTANT!** Address all correspondence & orders to: [orchidphile@optimum.net](mailto:orchidphile@optimum.net)

(Please mention either "Plant Pre-Order" & note the particular show/event or Mail Order in the subject line)

*This list replaces & supersedes all previous lists. All orders are filled in the order in which they are received and are subject to prior sale.*

*Prices are listed in US Dollars*

**OF SPECIAL NOTE:** We have now added a new section to show some of our first-bloom One-of-a-Kind novelty seedlings (not mericlones), many of which are from Dragon Tree Eagle breeding lines that we've purchased from some of the cutting-edge breeding programs in Taiwan. These are available on a First Come-First Serve basis ~ and each photo is of the actual seedling being offered.

We've also expanded our collection of **miniature Vandaceous, miniature Dendrobiums** & divisions of some of our select **Paphs** ~ all of which grow & flower happily with our Phals. Each genus is put into their own category after our Phal. listings.

Most plants are in 2.7" pots as first or second bloomers unless otherwise noted as being fully mature in 4" pots

**PLEASE NOTE:** Stock quantities of 6 or fewer are noted in parens

## **ORDERING INFORMATION FOR OUR MAIL ORDER CLIENTS:**

In the winter or during inclement weather, shipments may be delayed pending more moderate weather conditions. Shipping is either via FedEx Ground or Air depending on final destination. We reserve the right to withdraw any offering from sale and to limit quantities.

We guarantee all plants to be true to identity to the best of our knowledge. However, since many come in from Taiwan, we have to assume they are properly labeled as to their species or hybrid name. We make no warranty as to the productiveness of any plants sold since culture conditions vary widely.

Although we do our utmost to pack carefully, we are not responsible for damage to buds or flowers due to shipping if buyer specifically requests these plants ~ therefore, risk is assumed by buyer for buds or flowers on plants shipped at this stage  
Safe arrival of a healthy orchid plant is guaranteed.

## **Packing & Shipping Charges:**

Based on the total of your order, a minimum of 10% for packing plus the actual FedEx shipping cost will be charged. We use FedEx Ground for all 1-3 day deliveries within our delivery zone since Ground shipping rates are much more reasonable than Air.

If heat packs are requested, they will be provided at an additional charge.

## **SIZE DEFINITIONS:**

- PF = Previously flowered, fully mature Blooming Size plants
- F = Currently in flower (single spike unless otherwise noted)
- B = In bud (single spike unless otherwise noted)
- SP = In spike, just initiating to medium spike stage (single spike unless otherwise noted)
- BS = Blooming size (should flower in season)
- NBS = Near blooming size (approximately 1 year to flowering in season)
- S = about 2-3 years to flowering

## **PHAL SPECIES:**

*Most of these Phalaenopsis species are from Taiwan & were sibbed or selfed using very select parents*

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p><b>Phal. bellina fma. alba</b></p> <p><i>(Sib Cross of <b>FRAGRANT</b> Species)</i></p> <p><i>Rarely available but thanks to our annual trip to Taiwan, we were able to obtain a few seedlings from this newest sib cross of two alba clones ! These plants are just now reaching flowering size, being very slow to make it to maturity, and we're expecting a much improved strain of this alba form of the species resulting from select sibblings and selfings created by</i></p>	NBS/BS (5)	\$ 65

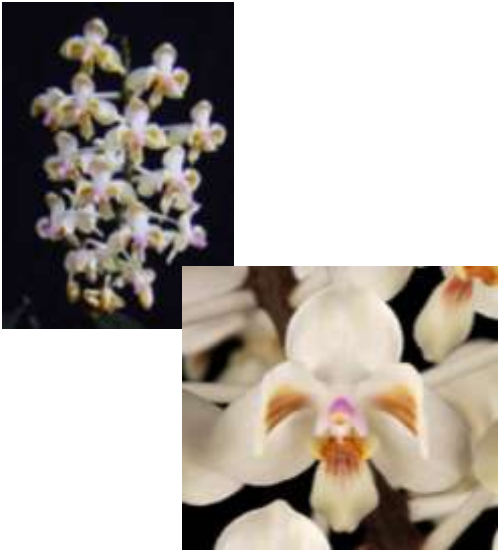

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p><i>this Taiwan nursery. Many will show a soft green picotee or tip on its segments. These plants will most likely spike up &amp; flower for the first time this summer, producing just 1-2 flowers initially. However, if the spike remains green, do not remove it as it will add more buds in addition to producing additional spikes.</i></p> <p><b>FRAGRANT !</b></p> <p><b>ONE-OF-A-KIND SEEDLINGS !</b></p>		
	<p><b>Phal. bellina fma. coerulea</b></p> <p><i>(Sib Cross of <b>FRAGRANT</b> Species)</i></p> <p><i>The fragrant &amp; beautiful Phal. bellina in a new color form ! Typically, Phal. bellina has a central pink blush/flush on all its segments ~ however, this strain has a more coerulean blue to lavender flush which, along with its deep lavender lip, makes quite a statement. This species tends to continue to flower again on older inflorescences in addition to producing new so don't remove them unless they turn yellow. We're guessing this group is about a year to flowering &amp; yet we've seen a couple spike up already showing their increased vigor as a sib cross ~ they sold immediately !</i></p> <p><b>FRAGRANT !</b></p> <p><b>ONE-OF-A-KIND SEEDLINGS !</b></p> <p><b>COLOR VARIABLE</b></p> <p><b>CHING HUA NURSERY, TAIWAN</b></p>	<p>NBS (1)</p>	<p>\$ 38</p>
	<p><b>Phal. celebensis</b></p> <p><i>(Sib Cross of Species)</i></p> <p><i>Endemic to Sulawesi, this miniature species has beautifully mottled silvery grey-green leaves making it an attractive addition to any collection, even when not in flower ! Usually flowering from late summer to early fall, its tall inflorescences can literally be covered with successively opening semi-peloric flowers, all presented on a gracefully cascading display. This particular Phalaenopsis species is one of the few that does better in shade &amp; kept moist year 'round. Not often available &amp; a really unique little treasure !</i></p> <p><b>MINIATURE !</b></p> <p><b>ONE-OF-A-KIND SEEDLINGS !</b></p> <p><b>JIAHO NURSERIES, TAIWAN</b></p>	<p>NBS (2)</p>	<p>\$ 35</p>

With its fabulously compact leaves &amp; growth habit, this species can readily form basal keikis, in time producing a specimen plant for the most dramatic display. An easy grower which is temperature tolerant, this tetraploid form is producing more vigorous growth with longer lasting flowers !</i></p>	<p data-bbox="1214 1379 1263 1442">BS (3)</p> <p data-bbox="1195 1545 1282 1570"><b>NEW !</b></p>	<p data-bbox="1377 1379 1435 1404">\$ 48</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;"><b>Phal. speciosa</b></p> <p style="text-align: center;"><i>(Species sib cross: 'Purple' x 'Dark')</i></p> <p><i>This sib cross was created using the two solid color forms shown on the left, both of them being progeny from a sibbing of the clone 'C#1'. The intense red-purple color from 'C#1' is spread out over all the segments of their flowers creating a stunning solid colored flower. Since this is a sib cross &amp; not a mericlone, we cannot guarantee that every seedling will flower solid ~ some may take after 'C#1' (which is also a sensational flower) with the rest being more heavily marked or totally solid like their parents. A great reason to flower more than just one !</i></p> <p style="text-align: center;"><b>FRAGRANT !</b></p> <p style="text-align: center;"><b>CHING HUA NURSERY, TAIWAN</b></p> <p style="text-align: center;"><b>ONE-OF-A-KIND SEEDLINGS !</b></p>	<p>NBS/BS (2)</p>	<p>\$ 38</p>
	<p style="text-align: center;"><b>Phal. violacea fma. coerulea</b> <b>(Indigo form !)</b></p> <p style="text-align: center;"><i>(Sib cross of this form of Species)</i></p> <p><i>A sib-cross of this fragrant species coming from two dark indigo parents from the breeding lines of HP Norton combined with those of Krull Smith ! These have been vigorous growers and might very well make their first spikes within the coming year. As a sib cross, there will be some variation in the intensity of blue from one seedling to the next.</i></p> <p style="text-align: center;"><b>FRAGRANT !</b></p> <p style="text-align: center;"><b>ONE-OF-A-KIND SEEDLINGS !</b></p> <p style="text-align: center;"><b>CHING HUA NURSERY, TAIWAN</b></p>	<p>NBS (2)</p>	<p>\$ 42</p>

**MULTIFLORAL MINIATURES, COMPACT-GROWING BRIGHTLY COLORED NOVELTIES & EVEN  
SOME LARGER-FLOWERING STUNNERS:**

*Again, most of these clones are the result of the excellent Taiwanese breeding programs.*

*Many of the plants below were hand-picked from select nurseries over the last several years on our annual trips to Taiwan.*

**PLEASE NOTE:** *With many of the harlequins & the red or orange novelties, differences in light & temperature at various times of the year will cause some variation to occur in the flower color and/or intensity of their markings. Under warmer temperatures & more shaded conditions in the summer, many red hybrids with yellow or orange in their breeding background will flower showing more of those colors. Under cooler temperatures & brighter light in the fall to winter months, the red pigment in the flowers is more strongly expressed resulting in solid red flowers.*

*Also, many of the Phal. bellina and/or violacea-influenced novelties improve in color intensity, size and fuller form on their 2<sup>nd</sup> & 3<sup>d</sup> flowerings, as do the actual species themselves.*

 	<p style="text-align: center;"><b>Phal. OX Golden Lottery 'OX1665' FCC/AOS</b></p> <p style="text-align: center;"><i>(OX Lottery x OX Golden Star)</i></p> <p><i>When we awarded this clone of OX Golden Lottery two years ago at the Taiwan Show, it was the most outrageous splash-petal yellow we had ever seen ! And that still holds true today ~ we have yet to see this kind of breeding produce anything even close to this. Producing flowers almost 4" in size, when awarded it was showing off with 34 superbly formed &amp; sparkling non-fading flowers on two branching inflorescences. In addition to receiving the highly coveted FCC/AOS, it also was awarded by the IPA as Best Phalaenopsis in Show from over 500 entries !</i></p> <p><b><i>SPECIAL NOTE ON THIS CLONE:</i></b>  <i>The first group of these that we brought in flowered as OX Lottery 'OX1525' so we contacted OX about this. We were told that they discovered those first run clones had all reverted to the OX Lottery parent &amp; suggested that we flower our second shipment, made from a second cloning in order to stabilize the results (only about a 30% success rate on that run). So far we have flowered just a few that are this actual OX Golden Lottery 'OX1665' with many more to flower out first before assuring everyone they would flower true. Once these seedlings are fully mature &amp; are flowered under cooler brighter winter conditions, their splash patterning will become much more intense, just like the awarded plant which flowered in Taiwan in the cooler brighter months of winter.</i></p> <p style="text-align: center;"><b><i>OX NURSERY, TAIWAN</i></b></p>	<p style="text-align: center;">SP  <b><i>2 spikes (2)</i></b></p> <p style="text-align: center;"><b><i>First bloomers</i></b></p> <p style="text-align: center;"><b><i>BRAND NEW !</i></b></p> <p style="text-align: center;"><b><i>VERY LIMITED</i></b></p>	<p style="text-align: center;">\$ 48</p>

**FIRST BLOOM ONE-OF-A-KIND NOVELTY SEEDLINGS (all are in 2.7" pots):**

*All of our novelty or select seedlings flowered for the first time for us this past summer ~ and with Phal. bellina in the background of many, as first bloomers they will initially produce only 1-3 flowers on their first spikes. For this line of breeding we leave any still-green spikes on the plants since they will most likely add more buds to these spikes in addition to producing new spikes at their next flowering. Some people choose to remove the initial spikes & give the energy back to the plant. However, we've never noticed (with this line of novelty-type breeding) that it doesn't make much, if any, difference in the overall vigor of the plant since their breeding background carries the tendency to retain older spikes. Also, with this kind of breeding, flower form, color and size improve enormously with their 2<sup>nd</sup> & 3<sup>rd</sup> flowerings. But ~ the real bonus to owning a One-of-a-Kind plant is that you can give it your own clonal name !*

### **FRAGRANT MINIATURE CHINESE CYMBIDIUMS:**

*All the species listed below grow & flower easily WITH our Phals under the same light & **WARMER** temperature conditions since they are miniature growing Chinese species, requiring much lower light, less space & will grow under warmer temperatures than their larger cousins ~ they also don't require the extreme chill of standard Cymbidiums in order to make their flower spikes and all tend to flower more than once a year, having no definite flowering season. One of these clones is just 6" in height – perfect for windowsill & under-lights growing !*

*We are particularly fond of the green & yellow flowering varieties with either delightfully compact or elegantly tall flower spikes. We've found that the traditional pale pink-burgundy colored flowers are just too muddy to stand out and make a statement.*

*The clone 'Tian Cao' also has the added charm of **VARIEGATED FOLIAGE**, meaning it's attractive, even when not in flower ! Variegated foliage comes at a higher price because it's greatly prized in Japanese & Chinese cultures, meaning the stronger the variegation, the more expensive the clone.*

Its beautiful foliage is lightly variegated just along the edges. The flowers are produced near the base of the foliage, usually one per inflorescence, the total height of the plant being just 6" – but what a flower for such a small wonder !</i></p> <p style="text-align: center;"><b>FRAGRANT !</b></p> <p style="text-align: center;"><b>VARIEGATED FOLIAGE !</b></p>	<p style="text-align: center;">PF (5)</p>	<p style="text-align: center;">\$ 58</p>

**MINIATURE VANDACEOUS:**

*All these species & hybrids grow & flower easily WITH our Phals under the same light & temperature conditions since they are miniature growers, requiring much lower light than their larger-flowered cousins. Their plant forms are micro-miniature to compact growing, many of them readily forming basal keikis to become beautiful specimen plants producing multitudes of spikes. And most of them are also delightfully FRAGRANT !*

	<p><b>Den. tobaense var. giganteum</b></p> <p><i>(Fragrant Compact-growing Species)</i></p> <p><i>Exotic doesn't begin to describe this amazing species ! A rare miniature, it creates 2-3 large fragrant green flowers on each spike, all sequentially produced along the length of each cane, all carrying the sweet fragrance of jasmine. Its impact is highlighted with a bright orange lip. Long lasting flowers with the ultimate in outrageously exotic !</i></p> <p><b>FRAGRANT !</b></p>	<p>PF (1)</p> <p><b>BRAND NEW !</b></p>	<p>\$ 55</p>
	<p><b>Den. Ueang Pheung</b></p> <p><i>(jenkinsii x lindleyi)</i></p> <p><i>The particular charm of this <b>FRAGRANT MICRO MINI</b> is that while it retains the miniature leaf habit of Den. jenkinsii, it took on the greater floriferousness of Den lindleyi, producing multitudes of large flowers on cascading spikes producing more than just Den. jenkinsii's habit of 2-4 flowers per spike. Will flower winter to spring on newly maturing growths !</i></p> <p><b>NOTE:</b> We've found this little hybrid does equally well whether grown in moss or a bark mix – and it readily makes the transition from moss to bark without missing a beat.</p> <p><b>FRAGRANT MICRO MINI !</b></p> <p><b>ONE-OF-A-KIND HYBRID SEEDLINGS !</b></p> <p><b>GENEROUS MULTIPLE GROWTH PLANTS</b></p>	<p>PF</p>	<p>\$ 38</p>

### **PAPHIOPEDILUMS:**

*Many of our Paphiopedilums are divisions of select plants from our collection ~ and are growing and flowering under the same conditions as our Phalaenopsis. Our particular favorites are miniatures from the parvi family, especially those with micranthum, armeniacum & delenatii as parents, and the larger growing, always grand & showy multiflorals, using philippinense or rothschildianum as parents. Pricing will vary according to the number of growths of each division/plant. Number of growths for each provided on request.*

	<p><b>Paph. Temptation 'orchidPhile'</b></p> <p><i>(kolopakingii x philippinense)</i></p> <p><b>This particular clone of Paph. Temptation just flowered for us for the first time this year ! Another hybrid which is slow to reach flowering maturity, we were struck by its crisply defined dorsal sepal &amp; charmingly twisting petals ~ its beautifully spaced flowers are presented proudly on tall inflorescences !</b></p>	<p>SP (1) 3 growth plant</p> <p><b>NEW !</b></p>	\$ 125

### **OTHER GENERA:**

*All the plants listed below grow & flower easily WITH our Phals under the same light & temperature conditions since most are miniature or micro-miniature growing species or hybrids, requiring much lower light than their larger cousins – they can put on quite a show for their compact size ! We also have divisions of several of our selected Cattleyas which we've grown & marked as exceptional from seedling populations – however, since we didn't take pictures of many when they were flowering, we will only bring divisions in bud or flower due to the variation among several clones of the same select hybrid.*

	<p><b>Bulb. falcatum fma. velutina</b> <b>'Gold Country' CCE/AOS</b></p> <p><i>(RARE COLOR FORM of</i> <i><b>MICRO-MINI</b> Species)</i></p> <p><i>Endemic to Ghana &amp; the Ivory Coast, this hot to warm growing species is the more rare DEEP RICH <b>BURGUNDY-RED</b> color form of an easy-growing species ! Producing a slightly longer inflorescence than other forms of this species, its many yellow-based flowers are so heavily suffused with red-purple spots as to appear solid red, flowering successively along an 11" inflorescence, usually late winter to early spring. Best grown under shady Phalaenopsis conditions, we've found this as easy a grower as other forms of Bulb. falcatum with the added punch of its deep burgundy-red color. Readily grows to specimen size !</i></p> <p><b><i>MICRO-MINIATURE !</i></b></p>	<p>F <b>(1)</b></p> <p>PF <b>(3)</b></p> <p><b><i>Multi-growth plants !</i></b></p> <p><b><i>NEW !</i></b></p>	<p>\$ 38</p> <p>\$ 33</p>
	<p><b>Burr. Sunkissed 'Buttercup'</b> (now Oncostelopsis) (Living Fire x Catatante)</p> <p><i>Although we don't carry many Oncidium mericlones, this particular one has always been a favorite for its adorable yellow flowers, floriferousness, ready branching habit and tendency to flower more often than others in this genus ! Compact growth, compact branching spikes and beautifully round pseudobulbs add to its charm. <b>New flowering growths are just initiating.</b> Its multitude of small golden yellow flowers are charmingly ruffled and add a welcome ray of sunshine to any collection !</i></p>	<p>F <b>(1)</b></p> <p>PF <b>(3)</b></p>	<p>\$ 33</p> <p>\$ 25</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;"><b>Chysis limminghei</b></p> <p style="text-align: center;"><i>(MINI Species)</i></p> <p><i>An adorable species endemic to Mexico which just loves warm to hot conditions ! When its new growth matures, it sends out a pendulous, robust inflorescence bearing fragrant, waxy, long-lasting flowers up to 3" in size. Large showy flowers can literally dwarf the miniature size of the plant and pseudobulbs. Easily grown &amp; flowered under Phalaenopsis conditions. The leaves will drop in the fall after flowering &amp; we recommend keeping the medium damp to avoid shriveling its pseudobulbs during the winter. This species does not like to be repotted with any great frequency so we're growing ours in New Zealand moss which allows for very little disturbance of its root system when repotting is needed to accommodate new growths.</i></p> <p style="text-align: center;"><b>FRAGRANT WAXY SPECIES !</b></p>	<p style="text-align: center;">PF (2)</p> <p style="text-align: center;"><b>BRAND NEW !</b></p>	<p style="text-align: center;">\$ 38</p>
	<p style="text-align: center;"><b>Cochleanthes amazonica</b></p> <p style="text-align: center;"><i>(possible 4N population)</i></p> <p style="text-align: center;"><i>(Species sib cross)</i></p> <p><i>A great sibling of two select clones of this species ! These have been blooming with larger size, fuller form flowers with amazingly heavy substance, &amp; more distinct &amp; dramatic purple striping on their lips than is typical for this species, leading us to wonder if this might be a 4N population. An easy grower under Phalaenopsis conditions, they will produce several spikes on each maturing growth with each spike bearing 1-2 flowers ~ just when we think a mature growth has finally finished flowering, we find yet another spike forming on it. These are multi-growth husky plants that may still produce even more spikes. As our smaller photo shows, they are quite capable of making a real impact !</i></p> <p style="text-align: center;"><b>FRAGRANT !</b></p> <p style="text-align: center;"><b>ONE-OF-A-KIND SPECIES SEEDLINGS !</b></p>	<p style="text-align: center;">PF</p> <p style="text-align: center;"><i>Husky multi- growth plants</i></p>	<p style="text-align: center;">\$ 33</p>

	<p style="text-align: center;"><b>Habenaria Regnieri</b> <i>(carnea x rhodocheila)</i></p> <p><i>A fabulous mating of two great species of Habenaria, many clones of which have been recognized with AOS awards ! Its beautiful silver-green spotted pattern on the wavy green leaves make this plant attractive, even when not in flower – and its compact growth habit allows it to fit readily into any collection. Large flowers are produced in the fall from the new spring growths bearing stunning salmon-pink flowers, creating up to 22 flowers on each inflorescence, the flower size being about 1 ¼". These plants are also benefitting from great hybrid vigor as a result of the mating of two species. Like our comments below on growing Habenaria rhodocheila, we follow the same culture for this little hybrid – and it, too, loves growing in New Zealand Moss ! Not available for the last two years, we were recently fortunate enough to obtain a few more from Taiwan.</i></p> <p><i>Being seedlings, not mericlones, there will be slight variation from one seedling to the next. But all have flowered this beautiful salmon-pink!</i></p> <p style="text-align: center;"><b>MINIATURE !</b></p>	<p style="text-align: center;"><i>New spring growth just emerging</i></p> <p style="text-align: center;">(2)</p>	<p style="text-align: center;">\$ 55</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;"><b>Habenaria rhodocheila</b> (Species)</p> <p><i>We have been amazed at how easy to grow this Habenaria species has been ! Even when not in flower, their foliage is beautifully marked. We've found that if we keep them just slightly moist with a light spritzing, not wet, when they go deciduous, they produce their spring growths readily. Allowing them to dry totally will most likely cause their loss over the winter – we know, we used to follow the culture sheets &amp; did just that – and they never came back ! We've also discovered that trying to grow them in a bark mix is more than challenging, so we've switched to growing them in moss. This population has been extremely vigorous &amp; is well worth adding to every collection. Plus, despite our initial doubts, they LOVE growing in the New Zealand moss ! We've been amazed at how really easy Habenarias are to grow &amp; flower – just don't follow any of the culture sheets &amp; you'll do great !</i></p> <p><i>Being seedlings, not mericlones, there will be some variation from one seedling to the next.</i></p> <p style="text-align: center;"><b>MINIATURE !</b></p>	<p style="text-align: center;"><i>New spring growth just emerging</i></p> <p style="text-align: center;">(2)</p>	<p style="text-align: center;">\$ 45</p>
	<p style="text-align: center;"><b>Habenaria xanthocheila</b> (Species)</p> <p><i>Another great Habenaria species bearing glowing bright yellow flowers ! These are small growing terrestrials with coral-like roots. In Malaysia they are found growing exposed on granite boulders. Produces beautiful erect inflorescences earlier than many other Habenaria species. Also, unlike other Habenarias, this species appears to have little serrations on its flower segments which add to its charm.</i></p> <p style="text-align: center;"><b>MINIATURE !</b></p>	<p style="text-align: center;"><i>New spring growth just emerging</i></p> <p style="text-align: center;">(1)</p> <p style="text-align: center;"><b>BRAND NEW !</b></p>	<p style="text-align: center;">\$ 95</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;"><b>Lagerara Angel Baby 'Peppermint Stick'</b></p> <p style="text-align: center;"><i>(Onc. Angel Island x Aspasia Tight Jeans)</i></p> <p><i>Although we were challenged trying to grow &amp; flower Odonts, this great new hybrid is quite happy growing with our Phalaenopsis ~ so we can now enjoy its Odontoglossum-type flowers on a warmer growing plant ! Great well-defined red-burgundy barring/blotching marks all its segments, its large flowers beautifully presented on the spike &amp; complete with a great ruffled lip. Compact grower for this type of breeding so it won't take over your bench ! (NOTE: Aspasia is a small genus of just 7 species related to Miltonia &amp; Brassia).</i></p>	<p style="text-align: center;">PF (1)</p>	<p style="text-align: center;">\$ 25</p>
	<p style="text-align: center;"><b>Onc. (Gomesa) Moon Shadow 'Tiger Tail' AM/AOS</b></p> <p style="text-align: center;"><i>(Cytocidium Hornet x Big Bee)</i></p> <p><i>We've always loved the brilliant yellow flowers of Onc. (Gomesa) varicosa, especially with its boldly contrasting deep chocolate petals ! However, under our growing conditions that particular species never did well at all. This little hybrid has lots of Onc. varicosa in its breeding background, yet it is so much easier to grow &amp; flower under our Phalaenopsis conditions. Vigorously branching spikes over miniature growths make this clone a sure winner !</i></p> <p style="text-align: center;"><b>MINIATURE !</b></p>	<p style="text-align: center;">F (1)</p> <p style="text-align: center;">PF (3)</p> <p style="text-align: center;"><b>BRAND NEW !</b></p>	<p style="text-align: center;">\$ 35</p> <p style="text-align: center;">\$ 28</p>
	<p style="text-align: center;"><b>Pot. Lovely Fantasy 'orchidPhile'</b></p> <p style="text-align: center;"><i>(Love Sound x Fire Fantasy)</i></p> <p><i>A rarely available division of our select clone of Pot. Lovely Fantasy ! Brilliant non-fading yellow flowers with the red splash on the tips of the petals &amp; sepals mimicking the red accent on its broad lip. Capable of producing up to three large 7-9 cm. flowers per inflorescence &amp; can bloom more than once a year. Easily grown &amp; flowered under Phalaenopsis conditions &amp; a beautifully compact plant with large showy flowers !</i></p> <p style="text-align: center;"><b>MINIATURE</b></p> <p style="text-align: center;"><b>DIVISION FROM SELECT CLONE</b></p>	<p style="text-align: center;">BS (1)</p>	<p style="text-align: center;">\$ 42</p>

	<p style="text-align: center;"><b>Pot. Young-Min Orange</b> <b>'Golden Satisfaction' AM/AOS</b></p> <p style="text-align: center;"><i>(Viola Nuggett x Lc. Trick or Treat)</i></p> <p><i>This spectacular clone of Pot. Young-Min Orange knocked all the AOS judges out with its amazingly floriferous display at the Taiwan International Orchid Show in 2010 &amp; again this year. It was awarded in 2010 with over 150 flowers and buds borne on 20 inflorescences, a display of vivid fiery orange, capable of producing 7+ flowers per spike when fully mature. This year, when exhibited again in Taiwan at the show, it had virtually doubled in size ! These vigorous plants can flower twice a year with long-lasting lightly <b>FRAGRANT</b> flowers, their orange intensifying as the flower matures. Grows &amp; flowers happily under Phalaenopsis conditions !</i></p> <p style="text-align: center;"><b>MINI-COMPACT GROWER !</b></p> <p style="text-align: center;"><b>MULTIPLE GROWTH PLANT</b></p>	<p style="text-align: center;">PF</p> <p style="text-align: center;"><i>Husky multi-growth plants</i></p>	<p style="text-align: center;">\$ 48</p>
	<p style="text-align: center;"><b>Slc. Li Juan Love 'Nippon'</b></p> <p style="text-align: center;"><i>(C. Cherry Chip x Slc. Hsinying Catherine)</i></p> <p><i>Capable of flowering twice a year, this great new compact Cattleya has it all ~ they just finished flowering in April &amp; are in puffy bud again now ! Its white flowers have their petal tips just lightly kissed with the same rich lavender-pink as its showy lip. A great mix combining the breeding heritage of C. Angelwalker, C. intermedia and Slc. Love Sound. Can produce up to 6 flowers on a single inflorescence on a fully mature plant and blooms faithfully on every new growth !</i></p> <p style="text-align: center;"><b>FRAGRANT !</b></p> <p style="text-align: center;"><b>COMPACT CATTLEYA !</b></p>	<p style="text-align: center;">PF (1)</p>	<p style="text-align: center;">\$ 58</p>

	<p style="text-align: center;"><b>Zygo. Advance Australia 'HOF' AM/AOS</b></p> <p style="text-align: center;"><i>(Titanic x Helen-Ku)</i></p> <p><i>We received an AM/AOS on this clone a few years ago &amp; still feel it's the best <b>FRAGRANT</b> Zygo around – a very easy and extremely compact grower, quite unlike most Zygopetalums available today which tend to really spread out &amp; take over your growing space ! The waxy green sepals &amp; petals are almost totally covered with chocolate brown blotches, and its broad lip is heavily overlaid with vivid purple right out to the narrow white picotee, a vast improvement over other Zygopetalum hybrids. These were first bloomers &amp; produced 3-4 flowers on their first spikes. As each plant matures, expect to see up to two spikes per each new growth and flowering more than once a year ~ multiple newly emerging growths only add to its delightfully fragrant bouquet ! A vigorous grower for this kind of breeding, it thrives when grown in New Zealand moss. Its heavy chocolate barring only varies with the light and temperature conditions (cooler &amp; brighter versus warmer &amp; shadier) when the spikes are forming. The absolute best of all Zygos. for its solid purple lip, rich rich color, full flat segments, delightful fragrance &amp; great compact growth habit !</i></p> <p style="text-align: center;"><b>FRAGRANT !</b></p> <p style="text-align: center;"><b>GREAT COMPACT GROWER !</b></p>	<p style="text-align: center;">PF</p>	<p style="text-align: center;">\$ 28</p>
