 Quantity discounts available, contact us for details.

### Species

Species	Pod	Pollen	Comments	price
<i>Paph rothschildianum</i>	 Paradise City'	 Paph Paradise' AM/AOS	Paradise City' has not been to judging yet, but has the potential to be a strong FCC. The color is outstanding and the form is excellent. 'Paph Paradise' received an 86 point AM/AOS on its first bloom. The petals and sepals are very wide and the color is intense. It is very likely to be upgraded to an FCC on a future bloom. We made this twice so we got a few more flasks from the second pod. These should be amazing!	\$350.00
<i>Paph hainanense</i>	 sib cross		By all accounts this is a synonym for <i>Paphiopedilum appletonianum</i> . We keep these labeled as hainanense as the foliage is distinctly different from typical appletonianum. A very easy to grow species that will bloom quickly from flask. A great choice for a beginner who wants to grow a species from flask as the plants don't get too big and they are very vigorous.	\$150.00

## Paph Paradise January 2023 Flask List

<p><b><i>Paph amabile</i></b></p>	 sib cross		<p>This is widely considered to be a synonym for <i>Paphiopedilum bullenianum</i> , but ours bloom at a different time of year and have some slight differences in flowers and foliage. If it is a synonym, perhaps ours originated from a different population. There is so much confusion among this appletonianum group. That's for the taxonomists to work out, we can just appreciate the beautiful foliage and flowers. A very easy to grow species.</p>	<p><b>\$150.00</b></p>
<p><b><i>Paph dayanum</i></b></p>	 sib cross		<p><i>Paphiopedilum dayanum</i> is relatively uncommon in collections. It is a very striking flower that can be about 6" across. They have a reputation for being fussy growers, but we have had no trouble. We keep them shady and warm, but they are able to take cooler and intermediate conditions. The pod parent is shown here...with the actual pod in the bottom left of the photo!</p>	<p><b>\$175.00</b></p>
<p><b><i>Paph sukhakulii</i></b></p>	 Merlot'	 Nearly Black'	<p>One of our best colored sukhakulii, with very dark black spots, crossed to an almost solid black petaled select plant from Tokyo Orchids. We may see some nearly solid black petals, and will definitely see very dark pouches. 'Merlot' has a large flower with exceptional color. We have high expectations for this cross.</p>	<p><b>\$175.00</b></p>

## Paph Paradise January 2023 Flask List

<p><i>Paph lowii album</i></p>			<p>This is an outcross of two excellent examples of this species. 'Chablis' has broad, full segments and a high flower count. 'Golden Emperor' is a select plant from Tokyo Orchid Nursery. The flowers are large and have exceptional color. This is a 'can't miss' cross!</p>	<p style="text-align: right;"><b>\$195.00</b></p>
<p><i>Paph ciliolare</i></p>			<p>This is a pretty rare species in cultivation. It is similar to curtisii in appearance but it seems to be a little more fussy about cooler winter temperatures. This strain seems to be growing well for us but it is still not recommended for beginners.</p>	<p style="text-align: right;"><b>\$195.00</b></p>
<p><i>Paph tigrinum</i></p>		<p>TBA'</p>	<p>'Gold Country' is a vigorous grower and a very high quality flower. The plant came from a seed pod set at the San Diego Zoo in plants that were siezed after an illegal importation. 'TBA' is a select seedling from the Orchid Zone. Bringing these two distinct lines together will provide vigor. Our new replate medium for this species has produced well rooted seedlings...something that is a challange in the lab.*** Limited availability***No discounts apply***</p>	<p style="text-align: right;"><b>\$250.00</b></p>

## Paph Paradise January 2023 Flask List

			<p>A sibling cross of two exceptional first bloom seedlings from our breeding. Very dark dorsal sepals and broad petals on both parents. This next generation should be even better!</p>	<p style="text-align: right;"><b>\$150.00</b></p>
<p><i>Paph villosum</i></p>	<p>Auslese'</p>	<p>Tawny'</p>		
<h3>Hybrids</h3>				
<p>Hybrid</p>	<p>Pod</p>	<p>Pollen</p>	<p>Comments</p>	<p>price</p>
			<p>This Delightfully Venus has large, bold spots. Here it is crossed to Paph Fluttering Ghost, which has a large flower with an exceptional red pouch. We hope to get some great colors and petals with large, dark spots. There should be some outstanding results from this cross.</p>	
<p>Paph</p>	<p>Delightfully Venus 'Sangria'</p>	<p>Fluttering Ghost</p>		<p style="text-align: right;"><b>\$150.00</b></p>

## Paph Paradise January 2023 Flask List

<p><b>Paph</b></p>	 <p>Emerald Sea 'Tokyo'</p>	 <p>Emerald Lake</p>	<p>The Emerald Sea parent was purchased From Tokyo Orchid Nursery (at great expense!) The Emerald Lake is a select plant from the Orchid Zone. Both parents are exceptional. We expect wide petals on large flowers. Some will have white on the dorsal and some will be solid green. There will be some amazing flowers from this cross!</p>	<p style="text-align: right;"><b>\$250.00</b></p>
<p><b>Paph</b></p>	 <p>Dot's Leopard 'Premier Cru'</p>	 <p>Double Wonder</p>	<p>Dot's Leopard has a larger, flatter dorsal sepal and a very dark pouch. The Double Wonder is a larger flower with wider petals. The best of these will have big, fat petals and amazing color. We hope to see many awards from this cross.</p>	<p style="text-align: right;"><b>\$150.00</b></p>
<p><b>Paph</b></p>	 <p>Mountain Lass 'Auslese'</p>	 <p>Mem. Sandra Pechter Song</p>	<p>The next generation of teacup Paph breeding. Mountain Lass 'Auslese' is more golden/orange than any of its siblings. Our awarded Mem. Sandra Pechter Song is a vigorous grower and is proving to be a fertile parent. We expect various shades of yellow through gold flowers on compact plants. Maybe a few spots will sneak in from the pollen parent. These should be wonderful!***limited***</p>	<p style="text-align: right;"><b>\$150.00</b></p>

## Paph Paradise January 2023 Flask List

<p><b>Paph</b></p>			<p>The absolute cutting edge of teacup breeding. Paradise Gem is one of the most successful teacup hybrids to date. 'Prosecco' AM/AOS is one of the few to have any color other than yellow. Lucky Charms created a quite a stir when I posted the first photo online. This is a very exciting cross and we can't wait to see the results! Expect some variability but also some real winners.</p>	<p style="text-align: right;"><b>\$250.00</b></p>
<p><b>Paph</b></p>			<p>We love fairrieanum hybrids. This should be interesting as we have never made a fairrieanum cross with a black petaled flower. We should see very dark flowers with the distinctive fairrieanum shape. Paph fairrieanum 'Magnum' is, as its name implies, HUGE! These crosses are usually extremely vigorous and can bloom very quickly from flask.</p>	<p style="text-align: right;"><b>\$150.00</b></p>
<p><b>Paph</b></p>			<p>Once again using the 'Magnum' clonal name...with good reason. This Petula's Flare was over 16 cm across on a first bloom! Put onto an incredibly dark and flat Petula's Sensation, we expect a mix of black petals and vinicolors that are much larger than previous black petal breeding. This should be a big step forward.</p>	<p style="text-align: right;"><b>\$150.00</b></p>

## Paph Paradise January 2023 Flask List

<p><b>Paph</b></p>			<p>A very dark, heavily spotted Double Wood was used for this cross. The Dot's Spots is huge and has very wide petals. The bright green background sets off the dark colors. We expect large, burgundy flowers with broad segments and spotted petals. These should be dynamite!</p>	<p style="text-align: right;"><b>\$150.00</b></p>
<p><b>Paph</b></p>			<p>Jacqueline's Spring Moon is a massive flower with excellent form on a tall stem. Oriental Aura has great form and dark green petals. These should be large and well proportioned flowers with wonderful green color. The foliage should be very attractive as well.</p>	<p style="text-align: right;"><b>\$150.00</b></p>
<p><b>Paph</b></p>			<p>Paph Macabre Illusion 'Alsace' has stunning color and a very glossy texture. Paph Hawaiian Volcano 'Dolcetto' has made two outstanding crosses for us in the past, so we expect it to perform well again. Its subtle colors are deceiving...it carries some amazing pigments that show up in its progeny. We should see some fantastic colors from this cross.</p>	<p style="text-align: right;"><b>\$195.00</b></p>

## Paph Paradise January 2023 Flask List

	 <p data-bbox="392 540 751 576">Dot's Spots</p>	 <p data-bbox="760 459 1150 576">Oriental Aura 'Bacchus' AM/AOS</p>	<p data-bbox="1159 277 1675 576">The first step on producing larger, more shapely green and white Maudiae Paphs. Sibling crosses from these seedlings should produce 25% greens. For this cross we still expect large coloratum flowers with good shape and color. The Dot's Spots is a very large flower and The Oriental Aura is large and quite well formed for a green.</p>	<p data-bbox="1822 548 1921 576"><b>\$150.00</b></p>
