5 plants	Laelia superbiens	cutting	Page 28	\$12.00

Cattleya Lady Crossley
(*C. gaskelliana* x *C. intermedia*)
primary hybrid

This plant was obtained from Santa Barbara Orchid Estate in November of 2014 and this is its first blooming. It is approximately 14" tall and is grown outdoors year-round under 55% shade cloth. It is an easy grower.

It blooms in February / March and the petals open with a light green hue and fade to white with yellow in the throat and a blush on the lip. It is fragrant with a very nice aroma.

The plants offered at the Mounting Workshop will be cuttings from this mature plant and should bloom next year around the same time.

Lc. Nice Holiday 'Suntopia' HCC/AOS
(Cattleya Mari's Song x Cattleya Flavina)
hybrid

This plant was obtained in March of 2010 from Carmela Orchids at the Santa Barbara Show and is approximately 10" tall. It is grown outdoors year-round under 55% shade cloth and it is an easy grower.

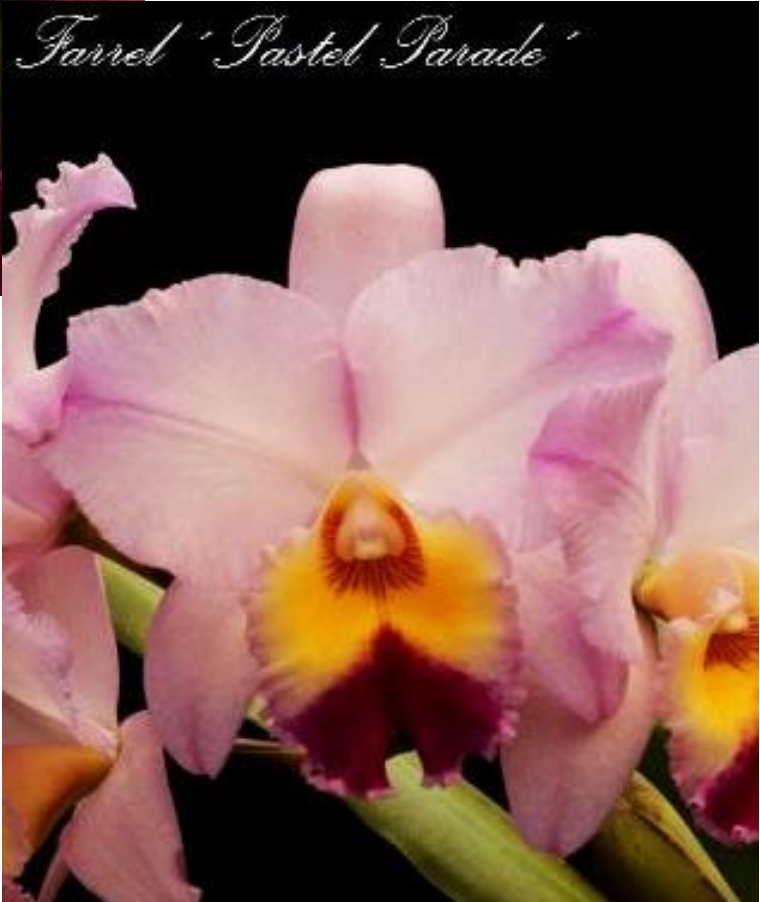

It blooms in February / March and the petals open yellow and fade to white. The lip and throat retain a light yellow color and the blush lightens a little.

The plants offered at the Mounting Workshop will be cuttings from this mature plant and should bloom next year around the same time.

similar flower

X

Pot. Mario Lanzo x Pot. William Farrell 'Pastel Parade'

This is a cross between the above shown orchid plants. It was purchased from Carmela Orchids as a plug in May of 2014 and has been growing happily outdoors during summer and winter under shade cloth.

Cattleya intermedia var. alba
species plant

This plant was obtained from Mariposa Garden in 2014 as a mature plant. It is approximately 16" in height and is blooming in March this year. It is grown outdoors year-round under 55% shade cloth and it is an easy grower.

Please note: the flowers shown in this picture are old and have been weathered and stained by two rains and overcast weather.

It is a cool to warm growing orchid and is fragrant. In nature, it tolerates, or enjoys, moist or humid conditions close to a body of water. It has been grown locally, under normal conditions.

The plants offered at the Mounting Workshop will be cuttings from this mature plant and should bloom next year around the same time.

Dendrobium anosmum alba

Dendrobium anosmum '4N'

x
x
primary hybrid

This is a hot to cool growing pendulous cane orchid that likes 50% shade and is fragrant. The canes can grow to 3 or 4 feet in length and are pendant or arching. This plant requires a dry period from October until the new growths appear in early spring and then they need to be watered and fed well. The flowers appear on the previous year's leafless canes. It was obtained from The OrchidWorks this year as a plug.

Two mounted D. anosmum shown above are for mounting reference.

Dendrobium anosmum '4N'

x

Dendrobium anosmum 'Blue Lip'

primary hybrid

This is a hot to cool growing pendulous cane orchid that likes 50% shade and is fragrant. The canes can grow to 3 or 4 feet in length and are pendant or arching. This plant requires a dry period from October until the new growths appear in early spring and then they need to be watered and fed well. The flowers appear on the previous year's leafless canes. It was obtained from The OrchidWorks this year as a plug.

Two mounted D. anosmum shown above are for mounting reference.

Oncidium sphacelatum
species plant

There are several mature plants from which these cuttings have been made. It is a warm to hot growing epiphyte that grows well in this area under approximately 75% shade conditions. It blooms in the spring with spikes that can reach 6 feet in length, with lateral to pendulous panicles that can carry many flowers. The flowers are faintly fragrant.

Please Note: This plant will also be available in pots for you to carry home and keep as they are, or to transplant into larger pots as a good start toward the specimen plant you see above.

Chrisnetia Green Light (aka Vanda Green Light) parents shown below

x

(*Vanda vietnamica* x *Vanda falcata*)
primary hybrid

This plant has been grown outdoors year-round for the last two years under 50% shade cloth and treated in the same manner as Cattleyas. Due to the cross of these parents it should stay a nice compact plant, somewhere between 4" to 5" in height. The flowers could be white to green with a white lip and may be fragrant.

It is an easy-care plant and is fully mature and blooming size. It came from The OrchidWorks as a plug in 2016.

Laelia perrinii
species plant

This plant is native to Brazil. It is a medium sized, warm to cool growing, epiphytic orchid that blooms in the late summer through the winter with 2 to 6, long-lasting 5 inch flowers. It likes 50% shade and grows well in our area.

It was obtained last year from The OrchidWorks as a plug.

Lc. Cariad's Mini-Quinee 'Angel Kiss'

(Mini Purple x *C. intermedia*)

hybrid

mericlone

This is a mini growing plant with nice sized flowers that grows well in this area. It is coerulea (blue) and peloric (the petals are mimicking the lip).

These plants, though on the small side, are all old enough to bloom, if they haven't already. They were obtained in 2014 from Carmela Orchids as a plug.

Pot. Beau's Golden Touch 'Touch of Class'
(Rhyncattleanthe Maxima's Effect x Rhyncholaeliocattleya Beaugold)
hybrid

This medium sized orchid has been growing outside in our area for over a year and is growing vigorously under 55% shade cloth.

It was obtained last year from The OrchidWorks as a plug.

X

Rlc. Robert's Choice x Lc. Carl Bornshine 'Mendenhall'
hybrid

This is a cross between the above shown orchid plants. It was purchased from The OrchidWorks as a plug last year and has been growing happily outdoors during summer and winter under shade cloth.

X

Rlc. Elegant Dancer 'Rouge' x Rlc. (Oconee x Sunset Sails)' 'Paradise Bird'
hybrid

This is a cross between the above shown orchid plants. It was purchased from The OrchidWorks as a plug last year and has been growing happily outdoors during summer and winter under shade cloth.

X

C. Horace 'Maxima' AM/AOS x Rlc. (Oconee 'Mendenhall' x Sunset Sail) 'Paradise'
hybrid

This is a cross between the above shown orchid plants. It was purchased from The OrchidWorks as a plug last year and has been growing happily outdoors during summer and winter under shade cloth.

X

C. Horace 'Maxima' AM/AOS x Pot. Mem. Jim Nickou 'James HCC/AOS'
hybrid

This is a cross between the above shown orchid plants. It was purchased from The OrchidWorks as a plug in August of 2016 and has been growing happily outdoors during summer and winter under shade cloth.

Slc. Final Touch 'Mendenhall' AM/AOS - mericlone
(C. California Apricot x C. Drumbeat)
hybrid

This plant was purchased from Carmela Orchids as a plug in October of 2014 and has been growing happily during summer and winter under shade cloth.

X

C. Summer Spot (4N) x C. Lulu (4N)
hybrid

This is a cross between the above shown orchid plants. It was purchased from H & R Nurseries as a compot in July of 2015 and has been growing outdoors happily during summer and winter under shade cloth.

(Rlc. Chungyeah 'Tzeng-Wen' x Pot. Love Call) x (Rlc. Love Sound x Slc. Jeweler's Art)
hybrid

This is a cross between the above shown orchid plants. It was purchased from The OrchidWorks as a plug in April of 2016 and has been growing outdoors happily during summer and winter under shade cloth.

x

x

C. Motte Spot 'Paradise' x Rlc. Hilo Grand 'Yuki'
hybrid

This is a cross between the above shown orchid plants. It was purchased from The OrchidWorks as a plug last year and has been growing outdoors happily during summer and winter under shade cloth.

***C. guttata* var. *coerulea* ('Keiko' x 'Sergio')**
species plant

This is a medium sized, cool to warm growing epiphyte or lithophyte which prefers 50% shade and has fragrant flowers. This species needs a distinct dry winter rest which in turn will bring about blooming.

It was obtained from H 7 R Nurseries as a compot in April of 2016.

Blc. Goldenzelle 'Golden Sapphire' AM/AOS x Pot. Delta Mist 'River Queen' HCC/AOS
hybrid

This plant was purchased from The OrchidWorks as a plug last year and has been growing happily during summer and winter under shade cloth.

X

(similar)

Lc. Melody Fair 'Carol' x Slc. Circle of Life 'New Ace' AM/AOS
hybrid

This is a cross between the above shown orchid plants. It was purchased from H & R Nurseries as a plug in August of 2016 in a compot and has been growing outdoors happily during summer and winter under shade cloth.

X

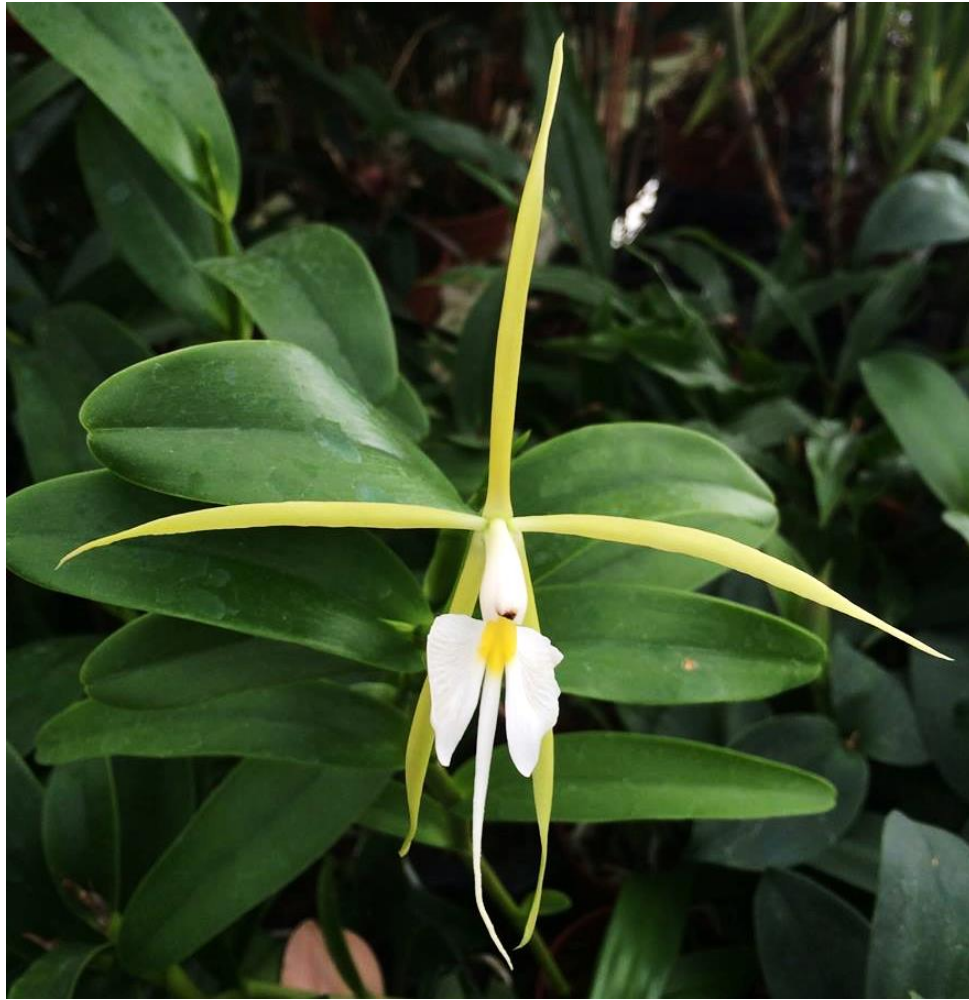

Lc. Jungle Elf (4N) x C. Small World (4N)
hybrid

This is a cross between the above shown orchid plants. It was purchased from H & R Nurseries as a plug in July of 2015 in a compot and has been growing outdoors happily during summer and winter under shade cloth.

C. Lumita
(Gene May x Lulu 'Spots')
hybrid

This plant was purchased from H & R Nurseries as a plug in July of 2015 in a compost and has been growing happily during summer and winter under shade cloth.

Epidendrum nocturnum
species plant

This is a large sized reedstem orchid that is a hot to cool growing epiphyte. It blooms in the summer through fall and each raceme can produce flowers for more than one season, giving rise to, fragrant [often nocturnally], large, showy, successively opening flowers occurring over months on newly mature and older pseudobulbs. It prefers 75% shade.

It was obtained from The OrchidWorks this year as a plug.

Laelia (Schomburgkia) superbiens
species plant

This species is from Central America and does very well in our area under 55% shade cloth.

It is a large sized hot to cool growing epiphyte that can grow to 4 feet in height (including the leaf) and can carry a 4 foot inflorescence on a mature pseudobulb with many showy, long-lasting flowers in the late fall and early winter.

This plant was originally obtained from one of the \$7.50, tables at Santa Barbara Orchid Estate when it was a little plant in November of 2003. It has been growing very happily under 55% shade cloth during both summer and winter.

Notes
