

# NEW HORIZON ORCHIDS JULY CYMBIDIUM SEEDLING OFFERING

A few comments. We did not bother to designate ploidy in this list as every cross is bred with tetraploid parents. We are sure that you are unlikely to find any other Cymbidium hybridizer able to offer over 50 crosses in such a wide assortment. We hope to be in attendance in July and will happily answer any of your questions.

These are basically established single growth seedlings of comparable size.  
**No plants will be sold until Friday, July 14.**

When you see an asterisk after the cross number, that means you can purchase up to three seedlings of that number. For all other crosses, only one plant per customer until after July 16 please.

All plants are \$12 each and customers buying ten or more seedlings can have their plants at \$10.00 each.

Thanks to the Roses for assisting us with this sale and we look forward to seeing you at the nursery!

For those who cannot attend the sale, please email your order to
