February 2020 PRE-ORDER LIST

www.facebook.com/orchidphile
(203) 329-7255

Address all correspondence & orders to: orchidphile@optimum.net

(Please mention "Plant Pre-Order" & note the particular show/event or "Mail Order" in the subject line)

This list replaces & supersedes all previous lists. All orders are filled in the order in which they are received and are subject to prior sale. Be aware that a few very special plants will only be reserved for your Pre-Order, for a show or mail order.

PLEASE NOTE: Prices are listed in US Dollars

NEW: We've chosen to separate the different types of Phalaenopsis into their very own sections to make finding the type of Phalaenopsis you like much easier:

Phalaenopsis Categories are now divided into:

Species, Multi-Floral Minis, Micro-Minis, "Big Lip" hybrids, Waxy (often Fragrant) Novelties & larger-flowering Classic Phalaenopsis in new colors & patterns

We've also expanded our collection of **miniature Vandaceous, miniature Dendrobiums, miniature Oncidinae & divisions of some of our select Paphs** in addition to **Miscellaneous Genera** ~ all of which grow & flower happily with our Phals. Each genus is put into their own category after our Phal. listings.

Most plants are in 2.7 - 3" pots as first or second bloomers unless otherwise noted as being in 4" pots
Stock quantities of 6 or fewer are noted in parens

ORDERING INFORMATION FOR OUR MAIL ORDER CLIENTS:

In the winter or during inclement weather, shipments may be delayed pending more moderate weather conditions. Shipping is either via FedEx Ground or Air depending on the final destination. We reserve the right to withdraw any offering from sale and to limit quantities. We guarantee all plants to be true to their identity to the best of our knowledge. However, since many come in from Taiwan, we have to assume they are properly labeled as to their species or hybrid name. We make no warranty as to the productiveness of any plants sold since everyone's culture conditions vary widely.

Although we do our utmost to pack carefully, we are not responsible for damage to buds or flowers due to shipping if buyer specifically requests these plants ~ therefore, risk is assumed by buyer for buds or flowers on plants shipped at this stage
Safe arrival of a healthy orchid plant is guaranteed.

Packing & Shipping Charges:

Based on the total of your order, a minimum of 10% for packing plus the actual FedEx shipping cost will be charged. We use FedEx Ground for all 1-3 day deliveries within our delivery zone since Ground shipping rates are much more reasonable than Air.
If heat packs are requested, they will be provided for an additional \$4.50.

Additional Shipping Note: FedEx charges an extra \$3.50 for "Home Delivery" so many of our clients choose to have their plants delivered either to their office or to a nearby FedEx Ship Center that accepts "Hold for Pickup" packages ~ those business/FedEx locations always get their deliveries much earlier in the day than the average Home Delivery. If you want to save the additional charge levied for Home Delivery, please let us know if you have a business address you would like to use, or we can research a FedEx location near you that would accept a Ground or Express package as a "Hold for Pickup".

During the colder & hotter months of the year, having your plants sent to either your business address or a FedEx location as a "Hold for Pickup" usually means it's delivered much earlier in the day & is not exposed to riding around on a cold or hot delivery vehicle for additional hours. So whenever possible, we highly recommend doing this.

SIZE DEFINITIONS:

PF = Previously flowered, fully mature Blooming Size plants
F = Currently in flower (single spike unless otherwise noted)
B = In bud (single spike unless otherwise noted)
SP = In spike, just initiating to medium spike stage (single spike unless otherwise noted)
BS = Blooming size (should flower in season)
NBS = Near blooming size (approximately 1 year to flowering in season)
S = about 2-3 years to flowering

PHAL SPECIES:

Most of these *Phalaenopsis* species are from Taiwan & reflect much improved forms & colors, having been sibbed or selfed using very select parents. Species like *Phal. bellina*, *violacea*, *venosa*, *speciosa*, *gigantea*, *viridis* and *javanica* are extremely slow to reach maturity & can be easily lost as small seedlings so we're only offering well-established Near Blooming or Blooming Size plants. As a result of their extra years to reach maturity, the pricing on these plants is higher than is usual for quicker growing & more readily available *Phal.* species.

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|---|---|--------------|
|  | <p>Phal. aphrodite subsp. formosana 'A09001' (4N) <i>(TETRAPLOID FORM of Species)</i></p> <p>A dynamite tetraploid form of this favorite of all <i>Phal.</i> species ! This clone is producing more compact leaves and much larger flowers than is typical for this subspecies of aphrodite. Its fuller form & beautifully round flowers with the petals almost touching carries great substance & produces a much longer-lasting display with a smaller leaf span than is typical for this species. And the bonus to this particular 4N strain is their naturally & gracefully cascading spikes which make for a stunning display !</p> <p>WINNER OF IPA BEST PHAL IN SHOW TROPHY !</p> | <p>PF (2)</p> <p>3"- 4" pots</p> | <p>\$ 45</p> |
|  | <p>Phal. bellina fma. coerulea <i>(Sib Cross of FRAGRANT Species)</i></p> <p>The fragrant & beautiful <i>Phal. bellina</i> in a new color form ! This cerulean strain has a blue flush which, along with its deep lavender lip, makes quite a statement. And a few from this sibbing will revert with a more typical rich pink bellina flush. This species will continue to flower on older inflorescences in addition to producing new. We're guessing this group is about a year from flowering & yet we've seen a couple spike up already, showing their increased vigor as a sib cross ~ of course, they sold right away !</p> <p>FRAGRANT ! ONE-OF-A-KIND SEEDLING !</p> | <p>BS (1)</p> | <p>\$ 75</p> |
|  | <p>Phal. cornu-cervi fma. chattaladae 4N (Mericlone) <i>(TETRAPLOID form)</i></p> <p><i>This is the genuine chattaladae form of Phal. cornu-cervi from David Grove, owner of the only known plant of this variety.</i></p> <p>OF NOTE: There are other red forms of <i>Phal. cornu-cervi</i> being offered – but they are actually fma. rubescens or a cross between fma. rubescens and possibly fma. chattaladae....all showing a hint of</p> | <p>BS (2)</p> <p>JUST IN</p> | <p>\$ 75</p> |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|--|--------------------------------------|--------------|
|  | <p><i>yellow in their lateral sepals and most with a yellow back to the flowers. Fma. chattaladae has a totally solid red back to its flowers with no hint of yellow anywhere except the very tips of the lateral sepals, & it retains its solid red color, even on the fading flowers, whereas fma. rubescens will begin to show yellow as the flowers fade.</i></p> | | |
|  | <p>Phal. equestris fma. alba</p> <p><i>(Rare pure alba form of Species)</i></p> <p><i>These seedlings are from the same population as a select form of this species to which we gave the clonal name 'Tara's Beauty' (pictured on the right) ! The flowers are fuller and much longer lasting than is typical for the species which leads us to wonder if it's a tetraploid (4N) population. Their vigorously branching spikes make this strain highly desirable. We often leave their still-green spikes on each plant since they can readily produce keikis on those spikes in addition to producing new flowering spikes !</i></p> <p>MINIATURE SPECIES ONE-OF-A-KIND SEEDLINGS !</p> | <p>BS (1)</p> | <p>\$ 42</p> |
|  | <p>Phal. equestris fma. aurea (Mericlone)</p> <p><i>(YELLOW LIP form of Species)</i></p> <p><i>A stunning variation on this beloved species, bearing pure white flowers accented with a golden-yellow lip ! Same compact leaf span & spike height as all the other members of this species with the potential to produce a keiki on its previously flowered spike. These have been unavailable for years so we were thrilled to find just a few more on our recent trip to Taiwan !</i></p> <p>MINIATURE SPECIES</p> | <p>BS (1) JUST IN</p> | <p>\$ 65</p> |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|---|---|-----------------------------|
|  | <p align="center">Phal. equestris fma. coerulea</p> <p align="center"><i>(Blue lip form of Species)</i></p> <p><i>This white form of Phal. equestris bears soft cerulean blue lips, varying slightly in their blue intensity according to light & temperature when they're forming. Beautifully compact spikes are produced on their first flowering. Always leave the still-green spikes on these plants since they can continue to either add additional buds or produce keikis from the original spike & still create new flowering spikes !</i></p> <p align="center">MINIATURE SPECIES ONE-OF-A-KIND SEEDLINGS !</p> | <p align="center">BS (2)</p> | <p align="center">\$ 55</p> |
|  | <p align="center">Phal. inscriptiosinensis</p> <p><i>Endemic to Sumatra found growing in light shade on forest trees, this small to medium sized species is a hot to warm grower. A summer bloomer, it produces 2-5 sequentially opening flowers. Keep moist ~ but not overly wet ~ year 'round. A charming species that's not often available !</i></p> <p align="center">ONE-OF-A-KIND SEEDLINGS !</p> | <p align="center">BS (2)</p> <p align="center">JUST IN</p> | <p align="center">\$ 48</p> |
|  | <p align="center">Phal. javanica</p> <p><i>Not often available, this strain is the result of a selfing of an extremely good form of this species ! Very compact pendulous spikes produce small flowers cascading over or between compact round leaves. Again, we've found this species does better in our greenhouses when grown a little cooler & shadier at a lower bench level. And for its best flowering display, many growers mount this species.</i></p> <p align="center">MICRO-MINI SPECIES ONE-OF-A-KIND SEEDLINGS !</p> | <p align="center">BS (2)</p> <p align="center">JUST IN</p> | <p align="center">\$ 48</p> |

|---|---|--|---|
|  <p data-bbox="147 678 636 751"><i>This is an actual photo of our plant when it flowered in April ! The green really comes out under brighter & cooler conditions.</i></p> | <p data-bbox="732 153 1084 220">Phal. tetraspis var. green <i>(Green tipped form of Species)</i></p> <p data-bbox="672 247 1146 653"><i>We sold out of these the minute we posted them a year ago ~ but we just found a few more to share ! When flowered in the winter, its green influence is not as strong as when it flowers during the spring or fall when it's brighter & cooler. Previously flowered spikes will stay green so don't remove them but allow them to continue to produce additional flowers in season while still creating new flowering spikes. We've also found that this particular color form of the species improves as the plants mature ~ a worthy addition to every collection !</i></p> <p data-bbox="708 695 1114 762">FRAGRANT SPECIES ONE-OF-A-KIND SEEDLINGS</p> | <p data-bbox="1195 149 1284 212">PF/BS (1)</p> | <p data-bbox="1365 149 1446 180">\$ 125</p> |
|  | <p data-bbox="773 821 1040 888">Phal. venosa 'CH' <i>(Select dark clone of Species)</i></p> <p data-bbox="672 915 1146 1213"><i>This is an exceptionally dark, almost solid in color, very select clone of this species ! Beautiful glossy green undulating leaves with cascading spikes around 5-7" long. In nature this species grows wet all year so fertilize and keep moist year round. Previously flowered spikes can continue to add buds in addition to new spikes emerging so don't remove older spikes until they turn brown. A summer into fall bloomer !</i></p> | <p data-bbox="1216 814 1256 877">SP (1)</p> | <p data-bbox="1373 814 1438 846">\$ 65</p> |

PHALAENOPSIS HYBRIDS

Most of these clones are the result of cutting-edge Taiwanese breeding programs & are plants we've hand-selected from some of the most forward-thinking nurseries during our annual trips to Taiwan to judge their TIOS Orchid Show. The advantage to many of the Multi-floral Minis is that they tend to spike more than once a year due to their breeding background. We've actually discovered that many were spiking again within 3-4 months after the initial flowering was over !

PLEASE NOTE: *With many of the harlequins & the blue, red or orange novelties, differences in light & temperature at various times of the year will cause some variation to occur in the flower color and/or intensity of their markings. Under warmer temperatures & more shaded conditions in the summer, many red novelty-type hybrids with yellow or orange in their breeding background will flower showing more of the influence of those colors. Under cooler temperatures & brighter light in the fall to winter months, the red pigment in the flowers is more strongly expressed resulting in solid to nearly solid red flowers.*

Also, many hybrids with a heavy Harlequin influence will show their boldest and most vivid colors when bloomed under cooler temperatures & brighter light during the fall & winter.

In addition, many of the Novelty-type hybrids with Phal. bellina and/or violacea in their background improve in color intensity and size with fuller form on their 2nd & 3^d flowerings, as do the actual species parents.

MULTI-FLORAL MINIATURES (including Harlequin & Peloric Multi-floral Minis):

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|--|--|---|-----------------|
|  | <p>Phal. Chia E Yenlin 'SRM1302' <i>(Sogo Yenlin x Formosa Cranberry)</i></p> <p><i>A stunning harlequin-influenced multi-floral miniature ! Its flowers are heavily suffused with harlequin spotting fusing to an intense & velvety dark fuchsia-burgundy (darker than our photo shows) covering most of the flowers, leaving just a charming fuchsia-pink picotee as a halo around its segments. This particular hybrid also has very attractive silvery-green foliage as opposed to the traditional dark green leaves of many miniatures. And as first bloomers they are already rewarding us with 2-3 compact spikes, while those that were cut back just a few months ago are spiking once again !</i></p> <p>MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p>B/F (6) 2-3 spikes</p> | <p>\$ 38-42</p> |
|  | <p>Phal. Fangmei Sweet 'OX1536' <i>(Little Gem Stripes x Dou-dii Golden Princess)</i></p> <p><i>A new "orange" multi-floral miniature created by a heavy suffusion of the red candy stripes from Little Gem Stripes over the golden-yellow background of Dou-dii Golden Princess ! Great compact spikes produce multitudes of 6.5cm flowers on branching sprays from fully mature plants, each flower outlined with a fine yellow picotee. Cooler & brighter conditions always produce the most vivid color. The best of all the seedlings & clones of Fangmei Sweet that we have seen in Taiwan over the last few years !</i></p> <p>MULTI-FLORAL MINI !</p> | <p>PF (1)</p> | <p>\$ 25</p> |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|--|--------------------------------------|--------------|
|  | <p>Phal. Kenneth Schubert '78' <i>(pulcherrima var. champornensis x violacea fma. coerulea)</i></p> <p><i>Multitudes of coerulea-flushed multi-floral miniature flowers are enhanced with darker coerulea splash-flaring on their petals due to the champornensis form of Phal. pulcherrima that was used in this re-make ! Finished with a rich dark coerulean lip, these blooming size plants are in 3.5" pots. When we saw the mother plant, it was overflowing with 6 branching spikes, creating the ultimate dramatic show !</i></p> <p>MULTI-FLORAL MINI</p> | <p>BS (2)</p> | <p>\$ 45</p> |
|  | <p>Phal. Lioulin Violin 'A11402' <i>(Chian Xen Violin x Chia E Yenlin)</i></p> <p><i>This particular hybrid is the same as that below but with totally different clonal results ~ this particular clone has taken strongly after the harlequin intensity of Chia E Yenlin with the addition of yet more harlequin influence from its Chian Xen Violin parentage heavily expressed centrally ! This is a real little stunner with compact spikes over nice compact leaf spans. As first bloomers they have already produced two spikes & as they reach full maturity we're expecting branching spikes to create the ultimate harlequin bouquet !</i></p> <p>HARLEQUIN MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p>B/F (4) 2 spikes</p> | <p>\$ 38</p> |
|  | <p>Phal. Lioulin Violin 'PS3572' <i>(Chian Xen Violin x Chia E Yenlin)</i></p> <p><i>A harlequin-touched multi-floral miniature, this new hybrid creates compact branching spikes of multitudes of chalk white flowers accented with harlequin accents in their lips ! As first bloomers they had already produced two branching spikes. And its harlequin influence varies with light & temperature. A delightful addition to any multi-floral mini collection with its dramatic touch of harlequin accents !</i></p> <p>MULTI-FLORAL MINI ! FLOWERS TWICE A YEAR !</p> | <p>PF/BS (1)</p> | <p>\$ 33</p> |

|--|--|--|---|
|  | <p style="text-align: center;">Phal. Liu's Berry 'Orchid House S.W.'</p> <p style="text-align: center;"><i>(Eduardo Quisumbing x parishii)</i></p> <p><i>Carrying the charmingly broad lips and flower size of the more difficult to grow species, Phal. parishii, this easy-to-grow hybrid has it all ! This clone of Liu's Berry has a gentle suffusion of its soft pink dusting covering all its segments, each flower brilliantly accented with a rich fluorescent pink lip. These little wonders have already been flowering with up to 5 spikes in just 2 ½" pots ! With a great compact leaf span & equally compact gently cascading spikes, this little gem fits easily into any collection & can flower twice a year !</i></p> <p style="text-align: center;">MICRO MINI !</p> <p style="text-align: center;">LIU'S NURSERY, TAIWAN</p> | <p style="text-align: center;">B/F</p> <p><i>2-4 spikes</i></p> <p style="text-align: center;"><i>Just opening their first flowers</i></p> | <p style="text-align: center;">\$ 35 - 42</p> |
|  | <p style="text-align: center;">Phal. Liu's Cute Angel 'KF#3' AM/AOS</p> <p style="text-align: center;"><i>(Jiaho Cherry x lobbbii)</i></p> <p><i>Just awarded an 82 point AM/AOS from our recent Cape & Islands Orchid Show exhibit ! A delightful 2-tone multi-floral mini with that fabulously contrasting broad brilliant red-orange lobbbii-type lip ! Capable of producing multitudes of branching spikes for an amazingly floriferous presentation ~ many of these spiked again within 2 months, meaning twice a year flowering. And this year we discovered that the cooler nights of fall to winter encouraged these same plants to create up to 6 spikes each ! The charm of this particular clone is that the petals & dorsal sepal are pink with the contrast of white bi-color accented lateral sepals, creating the perfect backdrop to highlight its fabulous broad lobbbii-influenced lip !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI !</p> <p style="text-align: center;">FLOWERS TWICE A YEAR !</p> | <p style="text-align: center;">SP/B (2)</p> | <p style="text-align: center;">\$ 42</p> |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|--|---|---|
|  | <p style="text-align: center;">Phal. Liu's Triprince 'KF #4'</p> <p style="text-align: center;"><i>(Eduardp Quisumbing x lobbii)</i></p> <p><i>Simply adorable ! This particular clone of Phal. Liu's Triprince stays wonderfully small while producing multiple branching spikes in perfect balance with its smaller leaf span. A smaller grower than the clone 'Yellow Lip', this little wonder is easily tucked into any collection, no matter how space-challenged it is !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI !</p> | <p style="text-align: center;">B/F (4) 1-2 spikes</p> | <p style="text-align: center;">\$ 30-35</p> |
|  | <p style="text-align: center;">Dtps. OX Happy Girl 'OX 1591' AM/AOS</p> <p style="text-align: center;"><i>(OX X-Ray x OX Little King)</i></p> <p><i>Just awarded its 87 point AM/AOS at the Taiwan International Orchid Show, this clone carried 25 delightfully round flowers with a beautiful Harlequin-influenced patterning. Flowers measured 3 1/4" on naturally arching branching spikes over attractively round leaves. One of the best of new harlequin multi-floral miniature breeding !</i></p> <p style="text-align: center;">DRAMATIC NEW MINI HARLEQUIN !</p> | <p style="text-align: center;">PF (1)</p> | <p style="text-align: center;">\$ 28</p> |
|  | <p style="text-align: center;">Phal. (Silbergrube x javanica)</p> <p><i>One of those "cute as a button" multi-floral minis ! Phal. javanica adds the charming accent of its candy striping to this little hybrid with Silbergrube giving it the perfect spike height while enhancing its sunset colors. Each plant will flower with varying intensities of the overlay color, from soft & subtle to bold & dramatic. Easily tucked into any collection & tends to flower more than once a year !</i></p> <p style="text-align: center;">FRAGRANT ! ONE-OF-A-KIND SEEDLINGS !</p> | <p style="text-align: center;">PF/BS (2)</p> | <p style="text-align: center;">\$ 42</p> |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|---|--|--------------|
|  | <p>Phal. Sogo Amar 'Amy Kuo' <i>(Nobby's Amy x Brother Amar)</i></p> <p><i>A totally delightful addition to our collection of multi-floral mini whites, crowned with a wonderfully yellow-enhanced lip ! Its 2" flowers are produced on compact spikes over equally compact leaf spans. Producing amazingly full form round flowers, rivaling some of the best in large standard whites, this is one superior mini to add to every collection. Ideal for under-lights, windowsill & space-challenged growing !</i></p> <p>MULTI-FLORAL MINI !</p> | <p>B/F (6)</p> <p>2 spikes</p> <p>NEW</p> | <p>\$ 35</p> |
|  | <p>Phal. Sogo Lemon Sunny '2764' <i>(Rong Guan Amah x I-Hsin Sunflower)</i></p> <p><i>A great mating of a white multi-floral mini, Phal. Rong Guan Amah, with a brilliant yellow waxy flower, Phal. I-Hsin Sunflower ! The result has been a multi-floral waxy bright yellow on compact spikes over an equally compact leaf span. A bright ray of sunshine with a smaller footprint & longer-lasting display ~ ideal for under-lights, windowsill & space-challenged growing !</i></p> <p>WAXY MULTI-FLORAL MINI !</p> | <p>F (1)</p> <p>2 branching spikes</p> <p>NEW</p> | <p>\$ 55</p> |
|  | <p>Phal. Summer Rose 'Blue Star' <i>(Kenneth Schubert x equestris fma. coerulea)</i></p> <p><i>A true cerulean blue multi-floral miniature with the blue coming from both parents ! Each flower is beautifully set off by a white column & intense velvety rich blue lip. These are amazingly vigorous & floriferous plants, already producing two spikes as first bloomers. And its blue color will be more intense under cooler & brighter conditions ~ it can vary according to the time of year when it flowers with its best color in the spring to early summer !</i></p> <p>CAN FLOWER TWICE A YEAR !</p> | <p>B/F (2)</p> | <p>\$ 35</p> |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|---|-------------------|-------|
|  | <p style="text-align: center;">Phal. Taida Blush 'Taida' <i>(Hilo Lip x Malibu Blush)</i></p> <p><i>As first bloomers in just 2.7" pots, these plants produced beautifully cascading spikes & are now flowering again ! With attractively round leaves, in perfect proportion to the spikes, this hybrid is a <u>much</u> easier grower than the difficult Hilo Lip, thanks to the pollen parent's influence. Yet it maintains that beautiful pristine white lip in contrast to the rich pink flower. This one will draw your eye from anywhere !</i></p> | F (3) | \$ 38 |
|  <p>OLD: original 'Taida Little Zebra'</p> <p>NEW: 'Taida Little Zebra <u>VA</u>' !</p> | <p style="text-align: center;">Phal. Taida King's Caroline 'Taida Little Zebra VA' AM/AOS <i>(Ever-spring King x Ho's Little Caroline)</i></p> <p><i>We just received an AM/AOS from the American Orchid Society for this spectacular clone ! VA is not a boo-boo on the clonal name of these plants ~ VA stands for "Variant" ! These are a mega SENSATIONAL clonal shift from the original older clone of 'Taida Little Zebra' (pictured at top). This fabulous shift has heavily emboldened the harlequin striping on the flowers, creating a stunning & dramatically dark presentation right to the tips of each segment. Same compact gently cascading spikes ~ same flowering habit ~ our photo doesn't even begin to show how dramatically marked & emboldened the flowers really are. A "gutsy" flower with even heavier substance, these are head & shoulders more stunning than the original clone of 'Taida Little Zebra' & are one of our specially selected "must have" favorites, flowering twice a year !</i></p> <p style="text-align: center;">CAN FLOWER TWICE A YEAR !</p> | B/F (4) | \$ 38 |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|--|---|---|---|
|  | <p style="text-align: center;">Phal. Timothy Christopher 'A08075'</p> <p style="text-align: center;"><i>(Cassandra x amabilis)</i></p> <p><i>The classic – and a backbone – of multi-floral miniature breeding – and producing even better plants today thanks to the improvement of sibblings and selfings of the best of its parents. Pristine pure white miniature flowers, along with a pure white lip, are produced on very compact branching spikes.</i></p> <p style="text-align: center;">MULTI-FLORAL MICRO-MINI</p> | <p style="text-align: center;">PF (1)</p> | <p style="text-align: center;">\$ 33</p> |
|  | <p style="text-align: center;">Phal. Younghome Little Vermilion 'YH0044'</p> <p style="text-align: center;"><i>(Younghome Sunkist x Brother Oconee)</i></p> <p><i>Our newest & most exciting find, this multi-floral mini is RED ! A mix of an art shade miniature with a rich pink miniature has created a little wonder that is producing 1-2 heavily branching compact spikes over very compact leaf spans. And thanks to its pod parent, its buds are very slow to open on the spikes along with much longer-lasting flowers due to their heavier substance than is typical for multi-floral minis. What we particularly love about this hybrid is the distinctive accent of its white column against the red full-form flowers leading to a striking display. Can flower twice a year !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p style="text-align: center;">B/F (5) 1-2 <i>branching spikes</i></p> <p style="text-align: center;"><i>Just opening its first flowers</i></p> | <p style="text-align: center;">\$ 38-42</p> |

| PHOTO | NAME & DESCRIPTION | SIZE | PRICE |
|---|--|------------------|-------|
|  | <p>Phal. Yushan Swif 'A09333' <i>(Sogo Yenlin x Sogo Kooper)</i></p> <p><i>The most vivid of solid pink multi-floral miniatures & a super compact grower ! We had forgotten how absolutely sensational this mini is from when we first saw one in flower. Sogo Yenlin is a beautiful full form dark pink mini ~ and mated with the sunset-tone Sogo Kooper, it has given its pink parent the additional punch of a yellow underlay creating electric pink long-lasting heavy substance flowers. Each segment carries a whisper of a narrow yellow picotee, setting each flower off to its ultimate. Very compact branching spikes in perfect proportion to its great compact leaves makes this the ideal little Phalaenopsis to grow on a windowsill or under lights. Many of these had just finished flowering, bearing two branching spikes as first bloomers, & were already spiking again !</i></p> <p>MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | PF (2) | \$ 33 |

MICRO-MINIS ~ PERFECT FOR SPACE-CHALLENGED COLLECTIONS:

| | | | |
|---|--|---------------------|-------|
|  | <p>Phal. Chienlung Cute Lobi 'M' <i>(Liu's Cute Angel x lobbii)</i></p> <p><i>Finally, an easy-to-grow primary hybrid of Phal. lobbii that flowers with even more flowers per spike than Phal. lobbii, but with the flowers being exactly like that charming species ! For many, Phal. lobbii is one of the more difficult species to grow so we're always looking for near-primaries that produce flowers like the species but are much easier to grow & flower. This little cutie flowers on very compact spikes over delightfully miniature round leaves, giving us, on its first flowering, two spikes with 5 or more flowers per spike & will continue to add more buds to its original spikes in addition to producing new. So if the spikes remain green, do not remove them. As these grow up we expect multiple spikes on very micro-miniature growers.</i></p> <p>MICRO-MINIATURE !</p> | BS/PF (1) | \$ 65 |
|---|--|---------------------|-------|

| | | | |
|--|--|--|--|
|  | <p style="text-align: center;">Phal. Su-An Cricket 'SW' (Gelblieber x mannii)</p> <p>Another exciting "find" at the 2018 Taiwan Show ! This little hybrid is hard to find so we ordered a few more the minute we saw them. With its great micro-mini leaf span & spike, it can produce an abundance of yellow-green full-form waxy miniature flowers. Due to its breeding background we have found these grow best under lower Phalaenopsis light. And the green expression in their flowers is more evident when flowered under cooler temperatures and higher light. A sensational little micro-mini !</p> <p style="text-align: center;">FRAGRANT WAXY MICRO-MINI !</p> | <p style="text-align: center;">BS (1)</p> | <p style="text-align: center;">\$ 75</p> |
|  | <p style="text-align: center;">Phal. Su's Glad Kid 'Blue' (Anna-Larati Soekardi x violacea fma. coerulea)</p> <p>A unique mix of three great species, Phal. pulcherrima, parishii & the blue form of violacea ! These are flowers that are about 2.5cm in size on compact spikes, flushed with blue pin-dotting on its lateral sepals & around its column. But the best part of this little charmer is the rich blue parishii-like broad lip against the chalk white flowers. Great for space-challenged collections & can flower more than once a year !</p> <p style="text-align: center;">FRAGRANT !</p> | <p style="text-align: center;">BS (4)</p> | <p style="text-align: center;">\$ 65</p> |

“BIG LIP” (Tri-Petaloid) HYBRIDS:

One of the most important factors in today's "Big Lip" breeding is a large flat lip that is almost identical to the petals ! We have seen some pretty poor hybrids in this new line of breeding over the past 2-3 years, with their "big lips" either cupped or crippled, or with the "lip" dropping so far down from the other segments of the flower that you could drive a truck right through it ! The clones we choose to carry must have a beautiful broad flat lip tucked right up into the flower itself so it gives the definite impression of a 3-petal flower. There have been only a few so far that meet those standards for us, & we're excited to be able to share some of them with everyone.

|---|---|--|--------------|
|  | <p>Phal. Chi-Yueh Mask 'CYS144' <i>(Liu's Bright Ruby x Fuller's F Plus)</i></p> <p><i>One of the boldest new multi-floral minis in "Big Lip" breeding ! The size of its large "Big Lip" lip really sets this clone apart from many of similar breeding. Liu's Bright Ruby brings the multi-floral mini flower size, branching & floriferousness to this new hybrid while Fuller's F-Plus gives it the exciting new lip. Added to that is the bold harlequin influence that emboldens its striped heritage and you have a new winner in this line of breeding !</i></p> <p>"BIG LIP" MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p>B/F (1)</p> | <p>\$ 35</p> |
|  | <p>Phal. Lianher Scallops <i>(Tying Shin World Class x Lianher Happy Smile)</i></p> <p><i>These little 1 ½" 'Big Lip' charmers are flowering for the first time in just 2" pots ! Its rich striping over a pink-flushed background comes from its pollen parent, with the scalloped 'Big Lip' coming from the pod parent, Tying Shin World Class, wonderfully set off with a narrow white picotee. A great new mini for this type of breeding, producing attractively flat 'Big Lips'.</i></p> <p>MULTI-FLORAL MINI ! FLOWERS TWICE A YEAR !</p> | <p>B/F (2) 1 ½" pots</p> | <p>\$ 33</p> |
|  | <p>Phal. Lianher Scallops 'A12190' <i>(Tying Shin World Class x Lianher Happy Smile)</i></p> <p><i>A great mating of Lianher Happy Smile, a beautiful harlequin mini, with the "big lip" Tying Shin World Class ! The result has been a multi-floral mini with a rich burgundy "big lip" finished with a harlequin moustache centrally. The candy striping from Lianer Happy Smile has also been intensified by the same harlequin heritage. What we really love about this new clone of the hybrid is its dark lip & harlequin moustache contrasting against the flower's white base color. It just all works !</i></p> <p>"BIG LIP" MULTI-FLORAL MINI ! CAN FLOWER TWICE A YEAR !</p> | <p>B/F (2) 1 ½" pots</p> | <p>\$ 33</p> |

|  | <p style="text-align: center;">Phal. OX Sunkist 'OX1637' AM/AOS</p> <p style="text-align: center;"><i>(Surf Song x Yu Pin Fireworks)</i></p> <p><i>Seen & awarded at a recent TIOS Show in Taiwan, this clone had everything going for it – so we ordered as many as we could ! Added to the amazing sunset color from Surf Song comes the BIG LIP from Yu Pin Fireworks, making for an arresting display of a tri-petal flower, around 3" in size. What we really liked about this particular clone was the flatness of the lip as opposed to many "big lip" clones we've seen that are showing a severely cupped lip, something we just don't like to see for this line of breeding...this one truly gives the appearance of three petals on a nice flat flower.</i></p> <p style="text-align: center;"><i>BIG LIP HYBRID !</i> <i>OX NURSERY, TAIWAN</i></p> | <p style="text-align: center;">PF (1)</p> | <p style="text-align: center;">\$ 38</p> |
|  | <p style="text-align: center;">Phal. Yu Pin Easter Island 'A11576'</p> <p style="text-align: center;"><i>(Sogo Yukidian x World Class)</i></p> <p><i>In this hybrid, a famous large white has been mated to Phal. World Class 'Big Foot' to create this "big lip" result ! As the chosen parent by many hybridizers to create new generations of "Big Lip" progeny, most clones of this hybrid are white or just lightly touched with pink. This particular clone produces stunning shell pink flowers with a generously full & flat lip tucked right into the flower, leaving no gaps, for a perfect 3-petal appearance. Elegant & naturally cascading spikes give it a wonderful presentation, and its peloric flat lip adds that special panache of something new and really different !</i></p> <p style="text-align: center;"><i>PELORIC "BIG LIP"</i></p> | <p style="text-align: center;">BS/PF (1)</p> <p style="text-align: center;">F (2)</p> | <p style="text-align: center;">\$ 38</p> <p style="text-align: center;">\$ 45</p> |

WAXY ~ OFTEN FRAGRANT ~ BRIGHTLY-COLORED NOVELTIES:

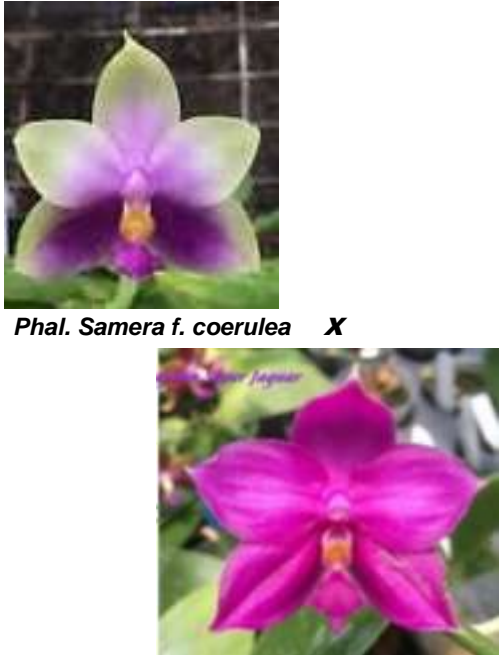

This group of Waxy Novelties includes limited Stem Props & Poly Props from Taiwan. As mentioned under Phal. species, due to the heavy influence of the slower-growing species of Phal. bellina, violacea, lueddemanniana, amboinensis & venosa in their breeding backgrounds, it often takes an additional year or two for these hybrids to reach flowering size as opposed to a standard Phalaenopsis. But once they do, they're well worth the wait for their vivid color, thick long-lasting waxy flowers & amazing fragrances. They also have a tendency to produce basal keikis from the mother plant for the ultimate presentation. In addition, many of these Novelty-type hybrids improve even more in their color intensity and size, adding fuller form on their 2nd & 3rd flowerings. They will retain previously flowered green spikes, continuing to add more buds to them, while still producing additional spikes ~ within a couple of years these plants can be surrounded with multiple spikes in full flower for a sensational show to please all the senses !

|  | <p>Phal. OX Prince 'OX1480' AM/AOS <i>(OX Black Jack x Leopard Prince)</i></p> <p><i>Seen & awarded at the 2014 Taiwan International Orchid Show, this particular clone of OX Prince displayed 12 full round flowers on a single branching inflorescence ! Firm substance on its 4+'' flowers adds to the longevity of its satiny display. Harlequin-influenced spotting over its white background makes quite a dramatic statement !</i></p> <p>NEW HARLEQUIN !</p> | <p>BS/PF (1) 4'' pot</p> | <p>\$ 38</p> |

SELECT ONE-OF-A-KIND NOVELTY SEEDLINGS:

Many of our novelty or select seedlings will be flowering for the first time for us this spring into fall ~ and with Phal. bellina in the background of many, as first bloomers they will initially produce only 1-3 flowers on their first spikes. This type of breeding is extremely slow to grow to maturity due to the heavy influence of the slower-growing waxy Phal species in their background. With these waxy novelties, we leave any still-green spikes on the plants since they will most likely add more buds to these spikes in addition to producing new spikes at their next flowering. Some people choose to remove the initial spikes & give the energy back to the plant. However, we've never noticed (with novelty-type breeding) that it makes much difference in the overall vigor of the plant since their parentage carries the habit of retaining older spikes. Also, their flower form, color and size improve enormously with their 2nd & 3rd flowerings. But ~ the real bonus to owning a One-of-a-Kind plant is that you can give it your own clonal name !

OTHER GENERA WHICH GROW HAPPILY UNDER PHALAENOPSIS CONDITIONS:

MINIATURE VANDACEOUS:

All these species & hybrids grow & flower easily WITH our Phals under the same light & temperature conditions since they are miniature growers, requiring much lower light than their larger-growing & flowering cousins. We're growing them in deep small plastic baskets to allow their roots to dry slightly between waterings. In the winter we slip these little baskets into rose pots to allow the roots to continue to grow down from the basket, our own approach to "collaring" that Alan Koch of Gold Country Orchids does with his plants in clay pots. These are mostly miniature, & a few compact, growing species & hybrids, many of which will readily form basal keikis to become beautiful specimen miniatures producing multitudes of spikes at the same time on all of their mature growths. And most of them are also delightfully FRAGRANT !

|  | <p style="text-align: center;">Vandachostylis Pinky (‘Red’ x sib)</p> <p style="text-align: center;"><i>(Neofinetia falcata x Rhy. gigantea)</i></p> <p><i>This sibling promises to be a super dark sibling of the wildly popular Vandachostylis Pinky since the base of all its leaves are almost black in color ! Its red pod parent resulted from a suffusion of the typical Pinky spotting to create a solid red result. We’re guessing ‘Red’ was sibbed with an equally dark red pollen parent to produce this next spectacular generation. Whether the progeny are solid or exhibit their spotted heritage, they will be dark, dark, dark & floriferous !</i></p> <p style="text-align: center;">FRAGRANT MINI !</p> <p style="text-align: center;">ONE-OF-A-KIND HYBRIDS !</p> | <p>NBS/BS (3)</p> | <p>\$ 33</p> |

MINIATURE/COMPACT DENDROBIUMS:

All the plants listed below grow & flower easily WITH our Phals under the same light & temperature conditions since they are miniature or compact growing species or hybrids, requiring much lower light than their larger cousins and needing no chill in order to set their buds – many are fragrant & can easily flower more than once a year, putting on quite a show for their diminutive size !

| PHOTO | NAME & NOTES | SIZE | PRICE |
|---|---|----------------------|--------------|
|   | <p style="text-align: center;">Dendrobium Angel Baby (‘Little Darling’ AM/AOS)</p> <p style="text-align: center;"><i>(Snow Baby x Snow Angel)</i></p> <p><i>An adorable, and very miniature, nobile-type Dendrobium which, when grown warmer & kept evenly moist, does not drop its leaves ! When we received the AM/AOS on this clone, it was showing off with 46 flowers on 12 spikes emerging from three 16cm (6.5”) tall canes. A little stunner with FRAGRANT white flowers delightfully set off with an apple green throat in the lip – can flower 3-4 times a year without needing a chill period like most nobile-influenced Dendrobiums. These will flower & re-flower on newly mature leaved canes in addition to re-flowering on previously flowered leafless canes. A rewarding little mini for windowsill or under-lights growing !</i></p> <p>NOTE: <i>This particular mini, despite being a Dendrobium, seems to prefer to be grown in moss with an even moisture supply. We initially grew them in bark & lost each one ~ they love the moss !</i></p> <p style="text-align: center;">FRAGRANT MINI !</p> | <p>PF/BS (3)</p> | <p>\$ 25</p> |

|  | <p style="text-align: center;">Den. Classic Gem 'Purple Queen'</p> <p style="text-align: center;"><i>(D'Bush Classic x Gemwood)</i></p> <p><i>Often called the Pansy-type Dendrobium, this type of hybrid is not often available ! What sets this particular clone apart from other Phalaenopsis-type Dendrobiums is its pelvic broad flat lip, to mimic a petal, which gives it the appearance of a Pansy in its shape. Heavily influenced by two Dendrobium species in its background, Den. phalaenopsis dominates for its flower size and full round form while Den. bigibbum gives its canes a much more compact growth habit. A warm grower, it produces an abundance of long lasting pansy-looking flowers.</i></p> <p style="text-align: center;">LOW LIGHT DENDROBIUM !</p> | <p style="text-align: center;">PF (1)</p> | <p style="text-align: center;">\$ 28</p> |
|  | <p style="text-align: center;">Den. Enobi Purple 'Splash' AM/AOS</p> <p style="text-align: center;"><i>(Enobi Komachi x Laguna Princess)</i></p> <p><i>This miniature Dendrobium received its AM/AOS at the Taiwan International Orchid Show in 2011 with 251 flowers & buds on 21 gracefully arching spikes. We've flowered them all to assure that they all are splash-petal – some of the mericlone population had reverted back so always ask if the grower has seen the flowers. Once fully mature, they will flower more than once a year, on new canes & again on previously flowered canes. And this new population, just in from Taiwan, has even more vivid & dark splash accents ~ we suspect this strain came originally from Thailand where the clones from their plant of this mini are dramatically better (see lower photo). A real show stopper and a vigorous grower capable of becoming an amazing miniature specimen in very little time !</i></p> <p style="text-align: center;">LOW LIGHT MINIATURE !</p> | <p style="text-align: center;">BS (2)</p> <p style="text-align: center;"><i>Larger plants arriving soon</i></p> | <p style="text-align: center;">\$ 28</p> |

|---|--|-----------------------------|--------------|
|  | <p style="text-align: center;">Den. Ueang Pheung <i>(jenkinsii x lindleyi)</i></p> <p><i>The particular charm of this FRAGRANT MICRO MINI is that while it retains the miniature leaf habit of Den. jenkinsii, it took on the greater floriferousness of Den lindleyi, producing multitudes of large flowers on cascading spikes, producing more flowers and buds than Den. jenkinsii's habit of 2-4 flowers per spike. Will flower any time, fall to spring, on its newly maturing growths !</i></p> <p><i>NOTE: We've found this little hybrid does equally well whether grown in moss or a bark mix – and it readily makes the transition from moss to bark without missing a beat.</i></p> <p style="text-align: center;">FRAGRANT MICRO MINI ! ONE-OF-A-KIND HYBRIDS ! MULTIPLE GROWTH PLANTS</p> | <p>PF/BS (3)</p> | <p>\$ 35</p> |

PAPHIOPEDILUMS:*

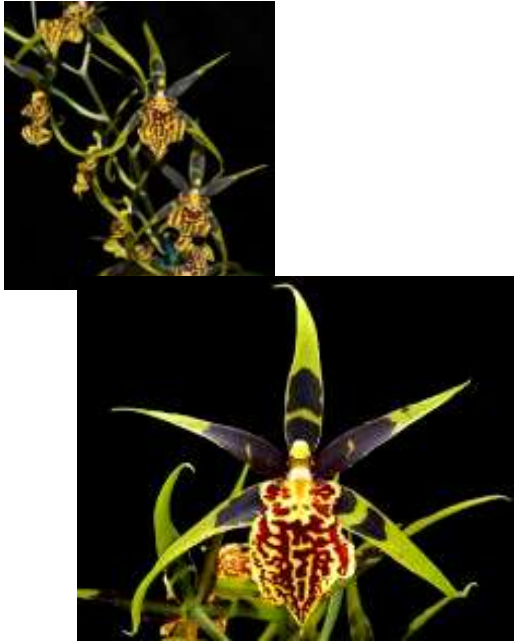

Many of our Paphiopedilums are divisions of select plants from our own collection ~ and are growing and flowering under the same conditions as our Phalaenopsis. Our particular favorites are miniatures from the parvi family, especially those with micranthum, armeniacum & delenatii as parents, and the larger growing, always grand & showy multiflorals, using philippinense or rothschildianum as parents. Pricing will vary according to the number of growths of each division/plant. Number of growths for each provided on request.

|---|---|--|--------------|
|  | <p style="text-align: center;">Paph. Dollgoldi ' #1' (<i>rothschildianum</i> x <i>armeriacum</i>)</p> <p><i>This particular multi-floral, due to the fact that Paph. rothschildianum is the pod parent, is very slow to mature to blooming size. But when it does flower, it's extremely showy & colorful ~ more than worth the wait ! Recipient of 49 AOS awards already.</i></p> <p style="text-align: center;">ONE-OF-A-KIND HYBRID !</p> | <p>NBS (1) <i>Pre-Order Only</i></p> <p>NEW !</p> | <p>\$ 45</p> |
|  | <p style="text-align: center;">Paph. micranthum (var. North Vietnam)</p> <p style="text-align: center;">(Species)</p> <p><i>A new strain of the highly coveted Paph. micranthum from North Vietnam and south of the Western China border ! This particular strain produces pouches that are shorter in length but broader than is typical for Paph. micranthum, giving the flower a much rounder & more pleasing shape. This is a one-of-a-kind seedling !</i></p> <p style="text-align: center;">ONE-OF-A-KIND SPECIES SEEDLING !</p> | <p>PF (1) <i>Pre-Order Only</i></p> <p>NEW !</p> | <p>\$ 75</p> |
|  | <p style="text-align: center;">Paph. Temptation 'orchidPhile' (<i>kolopakingii</i> x <i>philippinense</i>)</p> <p><i>This particular clone of Paph. Temptation has been an amazingly easy grower ! Another multi-floral hybrid which is slow to reach flowering maturity, we were struck by its crisply defined dorsal sepal & charmingly twisted petals ~ its beautifully spaced flowers are presented proudly on tall inflorescences. This stunning multi-floral hybrid has already been the recipient of 42 AOS awards !</i></p> <p style="text-align: center;">DIVISION OF OUR SELECT CLONE</p> | <p>NBS (1) <i>Pre-Order Only</i></p> <p>NEW !</p> | <p>\$ 95</p> |

ASSORTED GENERA:

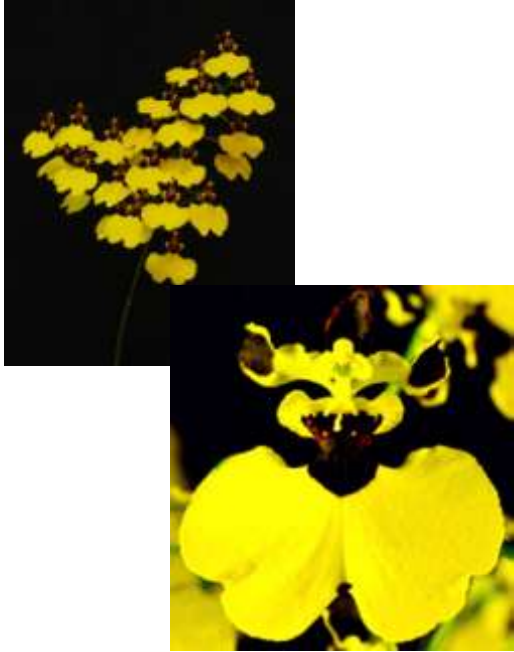

All the plants listed below grow & flower easily WITH our Phals under the same light & temperature conditions since most are miniature or micro-miniature growing species or hybrids, requiring much lower light than their larger cousins – they can put on quite a show for their compact size ! We also have divisions of several of our selected Cattleyas which we've grown & marked as exceptional from seedling populations – however, since we didn't take pictures of many when they were flowering, we will only bring divisions in bud or flower due to the variation among several clones of the same select hybrid.

Producing the same dark, almost black, flowers as Bratonia Kauai's Choice, this hybrid sports a brilliant red lip as opposed to the white lip of Kauai's Choice. Either hybrid is an eye-catcher, not only for its almost black flowers but also for its dramatically contrasting lips. A new favorite of ours !</i></p> <p data-bbox="695 1587 1130 1671">(NOTE: Although the petals & sepals appear brown in this photo, they are actually almost black.)</p> | <p data-bbox="1206 1094 1276 1157">SP/B (6)</p> | <p data-bbox="1382 1094 1446 1125">\$ 38</p> |

|  | <p style="text-align: center;">Zed. Kukoo <i>(Zelenkoa onusta x Onc. cheirophorum)</i></p> <p><i>We just love this newest petite micro-miniature find from the Oncidium family ! As a primary intergeneric hybrid of two perfectly delightful miniature species, it's capable of producing a multitude of small bright yellow flowers on tall, often branching, spikes over its micro-miniature foliage, the foliage being no more than 3-4" in height. This little charmer is infinitely easier to grow than its species parentage & flowers any time of the year, at least twice a year as its new growths mature. A delightfully adorable little accent orchid, perfect for windowsill, space-challenged or under lights growing !</i></p> <p style="text-align: center;">MICRO-MINI ONCIDIUM !</p> | <p>PF/BS <i>(4)</i></p> <p><i>Generous multiple growth plants</i></p> <p>BACK IN STOCK</p> | <p>\$ 35</p> |
