August 2018 PRE-ORDER LIST

Our August Special Pricing on Previously Flowered clones:

Valid only on orders placed from August 20th – September 3rd

www.facebook.com/orchidphile
(203) 329-7255

Address all correspondence & orders to: orchidphile@optimum.net

(Please mention "Plant Pre-Order" & note the particular show/event or "Mail Order" in the subject line)

This list replaces & supersedes all previous lists. All orders are filled in the order in which they are received and are subject to prior sale.

PLEASE NOTE: Prices are listed in US Dollars

NEW: as of this Pre-Order List, we've chosen to separate the different types of Phalaenopsis into their very own sections to make finding the type of Phalaenopsis you like much easier:

Phalaenopsis Categories are now divided into:

Species, Multi-Floral Minis, Micro-Minis, "Big Lip" hybrids, Waxy (often Fragrant) Novelties & larger-flowering Classic Phalaenopsis in new colors & patterns.

We've also expanded our collection of **miniature Vandaceous, miniature Dendrobiums** & divisions of some of our select **Paphs** in addition to **Miscellaneous Genera** ~ all of which grow & flower happily with our Phals.

Each genus is put into their own category after our Phal. listings.

Most plants are in 2.7" pots as first or second bloomers unless otherwise noted as being fully mature in 4" pots

PLEASE NOTE: Stock quantities of 6 or fewer are noted in parens

ORDERING INFORMATION FOR OUR MAIL ORDER CLIENTS:

In the winter or during inclement weather, shipments may be delayed pending more moderate weather conditions. Shipping is either via FedEx Ground or Air depending on the final destination. We reserve the right to withdraw any offering from sale and to limit quantities. We guarantee all plants to be true to identity to the best of our knowledge. However, since many come in from Taiwan, we have to assume they are properly labeled as to their species or hybrid name. We make no warranty as to the productiveness of any plants sold since everyone's culture conditions vary widely.

Although we do our utmost to pack carefully, we are not responsible for damage to buds or flowers due to shipping if buyer specifically requests these plants ~ therefore, risk is assumed by buyer for buds or flowers on plants shipped at this stage

Safe arrival of a healthy orchid plant is guaranteed.

Packing & Shipping Charges:

Based on the total of your order, a minimum of 10% for packing plus the actual FedEx shipping cost will be charged. We use FedEx Ground for all 1-3 day deliveries within our delivery zone since Ground shipping rates are much more reasonable than Air.

If heat packs are requested, they will be provided for an additional \$4.50.

Additional Shipping Note: FedEx charges an extra \$3.50 for "Home Delivery" so many of our clients choose to have their plants delivered to either their office or to a nearby FedEx Ship Center that accepts "Hold for Pickup" packages ~ those business/FedEx locations always get their deliveries much earlier in the day than the average Home Delivery. If you want to save the additional charge levied for Home Delivery, please let us know if you have a business address you would like to use, or we can research a FedEx location near you that would accept a Ground or Express package as a "Hold for Pickup".

SIZE DEFINITIONS:

PF = Previously flowered, fully mature Blooming Size plants

F = Currently in flower (single spike unless otherwise noted)

B = In bud (single spike unless otherwise noted)

SP = In spike, just initiating to medium spike stage (single spike unless otherwise noted)

BS = Blooming size (should flower in season)

NBS = Near blooming size (approximately 1 year to flowering in season)

S = about 2-3 years to flowering

PHAL SPECIES:

Most of these Phalaenopsis species are from Taiwan & reflect much improved forms & colors, having been sibbed or selfed using very select parents. Species like Phal. bellina, violacea, venosa, speciosa, gigantea and javanica are extremely slow to reach maturity & can be easily lost as small seedlings so we're only offering well-established Near Blooming or Blooming Size plants. As a result of their extra years to reach maturity, the pricing on these plants is higher than is usual for quicker growing & more readily available Phal. species.

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. aphrodite subsp. formosana 'A09001' (4N)</p> <p><i>(TETRAPLOID FORM of Species)</i></p> <p><i>A dynamite sibbing of this favorite of all Phal. species ! This population is a tetraploid form, producing more compact leaves and much larger beautifully round flowers with great substance, producing a long-lasting display with a much smaller footprint than is typical for the species. Gracefully cascading spikes make for a stunning display !</i></p> <p><i><u>Note:</u> We just won the IPA Best Phal in Show Trophy when we displayed this plant with its long cascading & beautifully arranged inflorescence !</i></p>	<p>PF (1)</p> <p>NEW LISTING</p>	<p>\$ 38</p>
	<p>Phal. bellina 'Red Apple' x self</p> <p><i>(FRAGRANT Species)</i></p> <p><i>This particular selfing of 'Red Apple' was made to achieve fuller rounder waxy fragrant flowers carrying an intense flush/blush over all its segments ! 'Red Apple' was specifically chosen for its red, rather than pink, flush, creating a stunning contrast against the creamy white flowers. Although slower to reach flowering size than many other Phal. species, it's more than worth the wait for its fragrance alone in addition to giving us a beautiful presentation during the hotter months of the year !</i></p> <p><i>We are releasing each plant of this clone as it flowers to assure they were labeled correctly since we did discover that one of this group, so far, was actually Phal. Matthew Chen (a bellina hybrid with similar leaves & spike habits).</i></p> <p>FRAGRANT WAXY SPECIES !</p>	<p>B/F (2)</p> <p>NEW LISTING</p>	<p>\$ 55</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. japonica 'Minmaru'</p> <p style="text-align: center;"><i>(Species - formerly known as Sedirea japonica)</i></p> <p><i>Although the photo doesn't show it very well, this particular clone of the fragrant Phal. japonica species has extremely small round foliage while still bearing flowers as large as the more common form ! When in full bloom the flowers can literally dwarf the foliage.</i></p> <p style="text-align: center;">FRAGRANT MICRO-MINIATURE</p>	<p style="text-align: center;">BS (1)</p> <p style="text-align: center;">NEW LISTING</p> <p style="text-align: center;"><i>These will only be brought to shows for Pre-Orders</i></p>	<p style="text-align: center;">\$ 48</p>
	<p style="text-align: center;">Phal. speciosa/tetraspis 'MS#1'</p> <p style="text-align: center;"><i>(Red color form of Species)</i></p> <p><i>The taxonomists still cannot necessarily agree on the differences between Phal. speciosa & Phal. tetraspis so we've noted both for this particular clone ! Both this clone and that of fma. imperatrix 'Red' flower with solid red fragrant waxy flowers on gently arching to pendulous inflorescences from spring to winter. Even when the initial flowers have faded, the still green spike will continue to produce and add more buds while at the same time producing an additional spike or two. The red expressed in the flowers is light and temperature dependent with cooler brighter winter conditions giving the most vivid red color. This clone was selected for its evenly balanced segments, making a perfect circle within all its tips, not to mention its intense solid red color !</i></p> <p style="text-align: center;">FRAGRANT MINIATURE</p>	<p style="text-align: center;">BS (2)</p> <p style="text-align: center;">NEW LISTING</p>	<p style="text-align: center;">\$ 55</p>
	<p style="text-align: center;">Phal. speciosa fma. imperatrix 'Red'</p> <p style="text-align: center;"><i>(Deep Red color form of Species)</i></p> <p><i>Like the clone 'MS#1', detailed above, this also could be either Phal. speciosa or tetraspis depending on which taxonomist you talk to ! The flowers on this clone tend to have a little less blue in their red color, but that again can vary with the time of year at flowering. Makes sense to simply have one of each !</i></p> <p style="text-align: center;">FRAGRANT MINIATURE</p>	<p style="text-align: center;">BS (3)</p> <p style="text-align: center;">NEW LISTING</p>	<p style="text-align: center;">\$ 55</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. venosa 'KF' (Select dark clone of Species)</p> <p><i>This is an exceptionally dark & select clone of this species ! Beautiful glossy green undulating leaves with cascading spikes around 5-7" long. In nature this species grows wet all year so fertilize and keep moist year round. Previously flowered spikes can continue to add buds in addition to new spikes emerging so don't remove older spikes until they turn brown. A summer into fall bloomer !</i></p>	<p>BS (1)</p> <p>NEW LISTING</p> <p><i>These just came in & are getting established ~ will be sold to experienced growers only until fully established.</i></p>	<p>\$ 55</p>

PHALAENOPSIS HYBRIDS

Most of these clones are the result of cutting-edge Taiwanese breeding programs & are plants we've hand-selected from some of the most forward thinking nurseries during our annual trips to Taiwan to judge their TIOS Orchid Show.

PLEASE NOTE: *With many of the harlequins & the red or orange novelties, differences in light & temperature at various times of the year will cause some variation to occur in the flower color and/or intensity of their markings. Under warmer temperatures & more shaded conditions in the summer, many red novelty-type hybrids with yellow or orange in their breeding background will flower showing more of the influence of those colors. Under cooler temperatures & brighter light in the fall to winter months, the red pigment in the flowers is more strongly expressed resulting in solid to nearly solid red flowers.*

Also, many hybrids with a heavy Harlequin influence will show their boldest and most vivid colors when bloomed under cooler temperatures & brighter light during the fall & winter.

In addition, many of the Novelty-type hybrids with Phal. bellina and/or violacea in their background improve in color intensity and size with fuller form on their 2nd & 3^d flowerings, as do the actual species parents.

MULTI-FLORAL MINIATURES (including Harlequin & Peloric Multi-floral Minis):

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. Chia E Yenlin 'LHB08' (Sogo Yenlin x Formosa Cranberry)</p> <p><i>A stunning harlequin-influenced multi-floral miniature ! Its flowers are heavily suffused with harlequin spotting fusing to a dark rich burgundy (darker than our photo shows) covering most of the flowers, leaving just a charming pink picotee as a halo around its segments. This particular hybrid also has very attractive silvery-green foliage as opposed to the traditional dark green leaves of many miniatures. And as first bloomers they're already rewarding us with 2-3 compact spikes, with those that were just cut back already spiking yet again !</i></p> <p>MULTI-FLORAL MINI !</p>	<p>SP/F (2)</p> <p><i>2-3 spikes in flower</i></p> <p>NEW LISTING</p>	<p>\$ 33</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p align="center">Phal. Formosa Blackberry 'G781'</p> <p align="center"><i>(Sogo Vivien x Happy Mark)</i></p> <p><i>A charming multi-floral mini with a touch of each one of its parents ! Carrying the multi-mini branching habit & flower size of the candy-stripe Sogo Vivien parent, it also has the harlequin accents from Happy Mark, a Golden Peoker hybrid. And adding an additional accent to these flowers, it has a rich rosy-red lip with flattened side-lobes to create a "big lip" appearance. These have produced amazingly floriferous double spikes as first bloomers in just 3" pots !</i></p> <p align="center">MULTI-FLORAL MINI !</p>	<p align="center">F (2)</p> <p align="center">NEW LISTING</p>	<p align="center">\$ 33</p>
	<p align="center">Phal. Formosa Cranberry 'Wilson'</p> <p align="center"><i>(Sogo Yenlin x Happy Mark)</i></p> <p><i>We love the way some of the peloric multi-floral miniatures show off with their vivid colors and multitudes of flowers on branching spikes ! Beautifully flat and charmingly wavy petals are heavily accented with bold harlequin blotches centrally making a fabulous display on readily branching spikes. Added to that are its beautiful silvery-green leaves which grow in a more upright habit, thus taking up less growing space. Who could ask for anything more ?</i></p> <p align="center">PELORIC MULTI-MINI !</p>	<p align="center">SP/B (1)</p> <p align="center">NEW LISTING</p>	<p align="center">\$ 55</p>
	<p align="center">Phal. (Gan Lin Passion x Lioulin Dazzle) 'OX1780'</p> <p><i>This particular cross has just been released by OX Nursery so doesn't even have a hybrid name yet ! A complex hybrid, bred to create the next generation of multi-floral miniature yellows, it combines two midi-size parents with multi-floral minis and miniature harlequins in their background. The result has been a floriferous non-fading yellow midi, its flowers about 6.8cm (2.5"), accented with a bold red lip & kissed with a white heart. Great substance coming from both parents assures a bright & long-lasting display of sunshine !</i></p> <p align="center">OX NURSERY, TAIWAN</p>	<p align="center">SP (3)</p> <p align="center">2 spikes</p>	<p align="center">\$ 28</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Jia Ho Summer Love 'Little Pixie' HCC/AOS</p> <p style="text-align: center;"><i>(Taisuco Micky x bellina)</i></p> <p><i>Emboldened with mega-intensified dark splashing/flaring from its harlequin-influenced multi-floral mini pod parent, Phal. Taisuco Micky, this new mini carries the super thick waxy flower substance, rich color & light fragrance from its pollen parent, Phal. bellina ! Thick & super compact leaves allow it to be tucked easily into any collection. A real eye-catcher which spikes for us almost immediately after removing previously flowered spikes, meaning twice a year flowering. It can also continue to form buds on previously flowered still green spikes in addition to producing new !</i></p> <p style="text-align: center;">LIGHTLY FRAGRANT ! WAXY MULTI-FLORAL MINI</p>	<p>BS (PF) (5)</p>	<p>\$ 33</p>
	<p style="text-align: center;">Phal. K S Sweet Diamond 'A08118'</p> <p style="text-align: center;"><i>(Ching Ann Diamond x Sogo Golden)</i></p> <p><i>A great mating of a multi-floral miniature with a waxy novelty & a great new direction in this line of breeding ! Ching Ann Diamond, a rich pink multi-floral, brings floriferousness to this hybrid while Sogo Golden, a waxy yellow novelty flower, adds its heavy substance, also giving the flowers their beautiful sunset/salmon color. As with many of this type of breeding, cooler temperatures & brighter light produce an even more intense flower color. A sensational & extremely long-lasting miniature display with glowing color !</i></p> <p style="text-align: center;">MULTI-FLORAL MINI</p>	<p>PF (4)</p> <p style="text-align: center;">NEW LISTING</p>	<p>\$28 August Special: \$ 18</p>

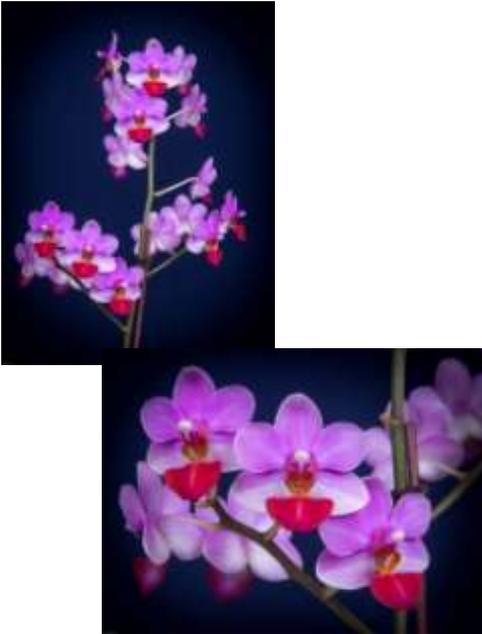

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. Kenneth Schubert 'Wilson' <i>(pulcherrima var. champornensis x violacea fma. coerulea)</i></p> <p><i>Multitudes of coerulea-flushed multi-floral miniature flowers are enhanced with darker coerulea splash-flaring on their petals due to the champornensis form of Phal. pulcherrima that was used in this re-make ! And true to both parents, it will continue to add buds to its spikes, creating a long-lasting display. (Unfortunately the photo doesn't begin to show the intensity of the splash-flaring is on its petals nor did it truly capture the "blue" of the flowers!) Finished with a rich dark coerulea lip, these young plants in just 2.5" rose pots have already produced two spikes. When we saw the mother plant, it was overflowing with 6 branching spikes, creating quite a show !</i></p> <p><i>(NOTE: Light & temperature will influence the intensity of its color depending on the time of year.)</i></p> <p>LIGHTLY FRAGRANT MINI ! WILSON ORCHIDS, TAIWAN</p>	<p>F (3) 2 spikes</p> <p>NEW LISTING</p>	<p>\$ 33</p>
	<p>Phal. Liu's Cute Angel 'KF#3' AM/AOS <i>(Jiaho Cherry x lobbii)</i></p> <p><i>Just awarded an 82 point AM/AOS from our recent Cape & Islands Orchid Show exhibit ! A delightful 2-tone multi-floral mini with that fabulously contrasting broad brilliant red-orange lobbii-type lip ! Capable of producing multitudes of branching spikes for an amazingly floriferous presentation ~ and they are now spiking again in just 2 months, meaning twice a year flowering at the least. The charm of this particular clone is that the petals & dorsal sepal are pink with the contrast of white bi-color accented lateral sepals, creating the perfect backdrop to highlight its fabulous broad lobbii-influenced lip !</i></p> <p>MULTI-FLORAL MINI !</p>	<p>BS (PF) (3)</p>	<p>\$ 35</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p align="center">Phal. Liu's Fantasy '2027'</p> <p align="center"><i>(Be Glad alba x Timothy Christopher)</i></p> <p><i>Adorable miniature flowers, showing a great mix of both famous parents and bearing bright golden-yellow lips – already producing two spikes in just a 2 ½" pot - a charmingly petite white mini-size multi-floral mini !</i></p> <p align="center">MULTI-MINI !</p>	<p align="center">PF (2)</p> <p align="center">NEW LISTING</p>	<p align="center">\$ 28 August Special: \$ 18</p>
	<p align="center">Phal. Meidarland Cherry 'MD'</p> <p align="center"><i>(Tying Shin Tarzan x Nobby's Amy)</i></p> <p><i>A stunning non-fading yellow with a central white heart, accented by a bright orange lip ! Aside from the impact of its color seen from across a large greenhouse in Taiwan, we really loved its wonderfully compact leaf span and spike height ~ all in perfect proportion to each other. Phal. Nobby's Amy gives this novelty hybrid a better more floriferous display while the pod parent, Tying Shin Tarzan, brings its brilliant color and heavy substance to the clone.</i></p> <p align="center">PLEASE NOTE: <i>We recently removed these near blooming size plants from their flask & have potted them up in NZ moss. We've been amazed at how quickly & strong they're growing in just two months! Being young seedlings still, these are for experienced growers only ~ we can deliver to a show, but all Mail Order reserves are being tagged & set aside for shipping in September 2018.</i></p> <p align="center">FRAGRANT NOVELTY !</p>	<p align="center">NBS (2)</p> <p align="center"><i>These will only be brought to shows for Pre-Orders</i></p>	<p align="center">\$ 35</p>

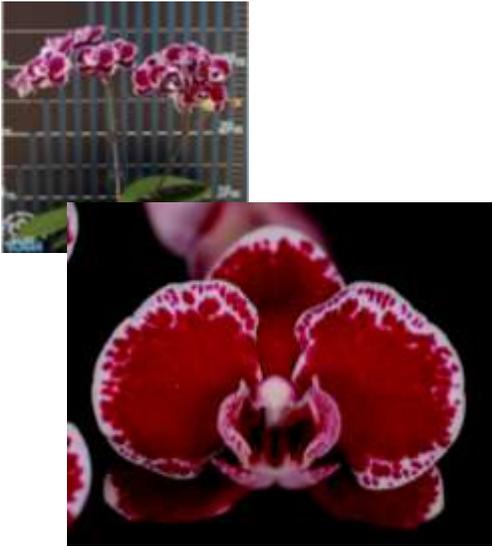

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Mini Mark 'Maria Teresa'</p> <p style="text-align: center;"><i>(Micro Nova x philippinense)</i></p> <p><i>A clone hand-selected by Carlos Fighetti a few years ago for its bright well-defined marks ! Very compact leaf spans over which compact branching spikes produce multitudes of little white & orange flowers. One of our most popular & often asked-for of all minis ! Best grown in slightly shadier & cooler conditions due to its Micro Nova parentage. We were fortunate enough to obtain the last of these from our grower in Taiwan, rarely available in the US. They are fully & super-mature plants which have already flowered with two+ branching spikes !</i></p> <p style="text-align: center;">MICRO MINI !</p>	<p>BS (PF) (2)</p> <p>NEW LISTING</p>	<p>\$ 75</p>
	<p style="text-align: center;">Phal. OX Cheese Moon 'OX1752'</p> <p style="text-align: center;"><i>(OX Cheese x OX Little Moon)</i></p> <p><i>Great new multi-floral harlequin miniature ! The pod parent is OX Cheese, one of our favorites, a heavy substance harlequin mini with blackened-burgundy bold striping. And OX Little Moon comes from Little Gem Stripes breeding. In this cross the harlequin influence has been further emboldened, creating an almost solid harlequin wash on its flowers, leaving a charming white picotee around all its segments. Flower size is around 5.5cm (2"), displayed on readily branching compact spikes in perfect proportion to its leaves.</i></p> <p style="text-align: center;">OX NURSERY, TAIWAN</p>	<p>SP (4)</p> <p>1-2 spikes</p> <p>NEW LISTING</p>	<p>\$ 28-33</p>

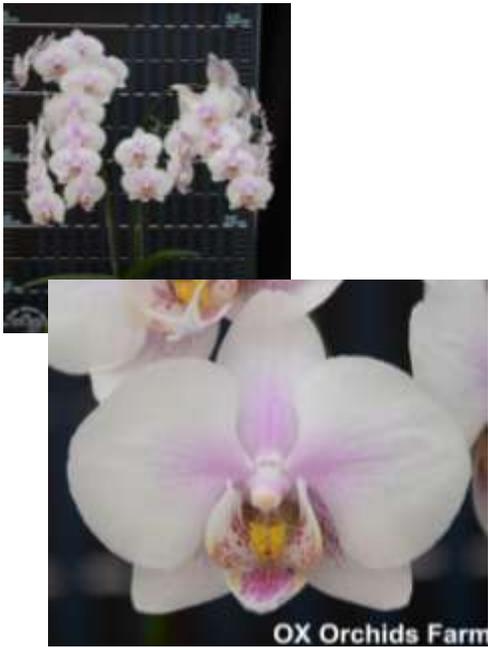

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. OX Happy Girl 'OX 1592' (OX X-Ray x OX Little King)</p> <p><i>A select clone, for its rich color intensity, of this great new harlequin multi-floral mini ! The flowers on this clone are around 2 ½" in size and will most likely not be much larger once the plants are fully mature. The harlequin spotting pattern is actually a rich blackened-burgundy and is quite a dramatic contrast against the pink and white background of the flower. In just 2.7" pots, our first order of these had already flowered once & just 4 months later were already spiking again. Will flower easily twice a year !</i></p> <p>BOLD NEW MINI HARLEQUIN ! OX NURSERY, TAIWAN</p>	<p>PF (1)</p>	<p>\$ 33 August Special: \$ 25</p>
	<p>Phal. (OX Hinamatsuri x Pinlong Cheris) 'OX1705'</p> <p><i>Phal. OX Hinamatsuri, the pod parent, is a standard size white with a central pink blush. Phal. Pinlong Cheris is a fragrant multi-floral mini coming from the famous Timothy Christopher breeding background. The result has been 7cm (2.5") flowers beautifully displayed on gracefully cascading spikes & perfectly arranged for an amazing display. Phal. Pinlong Cheris is fragrant, however we are not sure if the fragrance carried through to this hybrid (we forgot to smell it at the nursery when we saw the mother plant in flower!).</i></p> <p>OX NURSERY, TAIWAN</p>	<p>SP (5)</p>	<p>\$ 28</p>
	<p>Phal. Sogo Viven 'A10028' (Sogo Alice x Phal. Zuma's Pixie)</p> <p><i>A unique MULTI-FLORAL MINI bearing multitudes of small crisp candy-striped flowers on a cascading spray, its branches cascading to create a virtual "umbrella" of flowers !</i></p> <p>SOGO NURSERIES, TAIWAN</p>	<p>PF (1)</p>	<p>\$ 28 August Special: \$ 18</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Sogo Vivien 'Golden Leaves' (Variegated form)</p> <p style="text-align: center;"><i>(Sogo Alice x Zuma's Pixie)</i></p> <p><i>Everyone loves this multifloral miniature, Phal. Sogo Vivien, for its multitudes of charming small candy-striped flowers ! This particular clone has a brand new element to set it apart from all the other Sogo Vivien's ~ beautifully variegated foliage, making it attractive even when not in flower. No two plants will exhibit the same variegation & each leaf on each individual plant will be slightly different in the degree of its variegation depending on light & temperature when forming. Add to that its wonderfully compact readily branching spikes & you have quite a striking display !</i></p> <p style="text-align: center;">VARIEGATED MULTI-MINI !</p>	<p style="text-align: center;">F 2 spikes (3)</p> <p style="text-align: center;">NEW LISTING</p>	<p style="text-align: center;">\$ 33</p>
	<p style="text-align: center;">Phal. Sogo Vivien 'Wilson' (Peloric with Variegated Leaves !)</p> <p style="text-align: center;"><i>(Sogo Alice x Zuma's Pixie)</i></p> <p><i>Everyone loves the multi-floral candy-striped Phal. Sogo Vivien for its multitudes of charming small candy-striped flowers ! This particular clone has TWO new elements to set it apart from all the other Sogo Vivien's ~ beautifully variegated foliage <u>AND</u> fabulously flat PELORIC flowers. We brought two of these plants back bare-root & in flower, from the TIOS Show in March in hopes that one would last a few weeks to use as a sample for previously flowered stock. Amazingly, both plants are still in flower, readily adding more & more buds, almost 6 months later, despite their bare-root travel-related stress. Its medium height spikes with readily branching inflorescences create quite a striking display ~ these are nothing short of simply sensational !</i></p> <p style="text-align: center;">VARIEGATED PELORIC MULTI-MINI !</p>	<p style="text-align: center;">BS (PF) SP</p> <p style="text-align: center;">NEW LISTING</p>	<p style="text-align: center;">\$ 55 \$ 65</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. Sun Jye Diamond 'KV39'</p> <p><i>(Sun Prince x Freed Sandra)</i></p> <p><i>Gracefully cascading spikes of rich glowing fuchsia-pink full round flowers, each flower presented perfectly on the inflorescences for the most dramatic display ! As first bloomers in just 2.7" pots they were already showing off with two heavily flowered spikes, so we can only imagine the show they'll provide when fully grown up with multitudes of branching cascading spikes. If we could only grow one solid dark pink multi-floral mini, this would be the one for its vibrantly rich color & abundant presentation !</i></p>	<p>PF (2)</p>	<p>\$ 22 August Special: \$ 18</p>
 <p>OLD: original 'Taida Little Zebra'</p>  <p>NEW: 'Taida Little Zebra <u>Va</u>'</p>	<p>Phal. Taida King's Caroline 'Taida Little Zebra Va' AM/AOS</p> <p><i>(Ever-spring King x Ho's Little Caroline)</i></p> <p><i>We just received an AM/AOS from the American Orchid Society for this particular clone ! Va is not a boo-boo on the clonal name of these plants ~ Va stands for "Variant" ! These are a mega SENSATIONAL clonal shift from the original older clone of 'Taida Little Zebra' (pictured at top). This fabulous shift has heavily emboldened the harlequin striping on the flowers, creating a stunning & dramatically dark presentation. Same compact spikes ~ same flowering habit ~ our photo doesn't even begin to show how dramatically marked & emboldened the flowers really are. A "gutsy" flower with even heavier substance, these are head & shoulders more stunning than the original clone of 'Taida Little Zebra' & are one of our specially selected "must have" favorites !</i></p> <p>TAIDA NURSERY, TAIWAN</p>	<p>F (3) 2 spikes</p> <p>PF (2)</p>	<p>\$ 45</p> <p>\$ 45 August Special: \$ 38</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
 <p data-bbox="183 894 602 940"><i>The same flowers grown under warmer & shadier conditions</i></p>	<p data-bbox="704 163 1097 239">Phal. Taisuco Micky 'Burgundy' <i>(Golden Peoker x pulcherrima)</i></p> <p data-bbox="667 275 1143 821"><i>In this particular clone of Phal. Taisuco Micky, the harlequin pod parent has suffused the entire flower with a deep blackened-burgundy, thanks to the intense color of Phal. pulcherrima ! Taking advantage of two different & very select clones of its parentage, this clone has produced rich blackened-burgundy flowers resulting from layer upon layer of harlequin suffusion from its Golden Peoker pod parent ~ the degree of its harlequin suffusion is dependent on light & temperature, with shadier and warmer conditions producing flowers which reveal a contrasting broad white picotee around all its segments. As a compact grower producing compact branching spikes of heavier substance flowers, it can continue to produce its amazing display for months !</i></p> <p data-bbox="745 854 1065 884">MULTI-FLORAL MINI !</p>	<p data-bbox="1214 163 1252 226">PF (6)</p>	<p data-bbox="1372 163 1430 193">\$ 35</p>

	<p style="text-align: center;">Phal. Chienlung Cute Lobi</p> <p style="text-align: center;">Mericlone</p> <p style="text-align: center;"><i>(Liu's Cute Angel x lobbii)</i></p> <p><i>Finally, an easy-to-grow primary hybrid of Phal. lobbii that flowers with even more flowers per spike, the flowers being exactly like that charming species ! For many, Phal. lobbii is one of the more difficult species to grow so we're always looking for primaries that produce flowers like the species but are much easier to grow & flower. This little cutie flowers on very compact spikes over an equally compact leaf span, giving us, on its first flowering, 4-5 flowers per spike. As these grow up we expect multiple spikes on very miniature growers.</i></p> <p style="text-align: center;">MICRO-MINIATURE !</p>	<p style="text-align: center;">PF (2)</p> <p style="text-align: center;">NEW LISTING</p> <p style="text-align: center;"><i>These will only be brought to shows for Pre-Orders</i></p>	<p style="text-align: center;">\$ 65</p>
	<p style="text-align: center;">Phal. San Shia Appendo</p> <p style="text-align: center;"><i>(appendiculata x pulcherrima)</i></p> <p><i>Just about as cute as a micro-mini Phalaenopsis can be, these plants retain a micro-mini leaf span with small flowers which carry that great Phal. appendiculata lip. A fully mature plant can carry a multitude of very compact spikes in perfect proportion to the leaf span, creating a sensational micro-miniature show. This particular hybrid gives us the great charm of Phal. appendiculata without the difficulty of growing that species, thanks to its pollen parent, Phal. pulcherrima. And its micro-miniature leaf span means it can be tucked anywhere in any collection without being a space hog !</i></p> <p style="text-align: center;">MICRO-MINIATURE !</p>	<p style="text-align: center;">PF (2)</p> <p style="text-align: center;">NEW LISTING</p>	<p style="text-align: center;">\$ 33</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Su-An Cricket 'SW' (Gelblieber x manii)</p> <p>Another exciting "find" at the 2018 Taiwan Show ! This little hybrid is hard to find so we hand-carried these plants back to the US bare-root, & they're now thriving in their new pots. A great compact leaf span & spike can produce an abundance of yellow-green full-form waxy miniature flowers. Due to its breeding background we have found these grow best under lower Phalaenopsis light. And the green expression in their flowers is more evident when flowered under cooler temperatures and higher light. A sensational little micro-mini !</p> <p style="text-align: center;">FRAGRANT WAXY MICRO-MINI !</p>	<p style="text-align: center;">BS (2)</p> <p style="text-align: center;">NEW LISTING</p> <p style="text-align: center;"><i>These will only be brought to shows for Pre-Orders</i></p>	<p style="text-align: center;">\$ 65</p>

BIG LIP HYBRIDS:

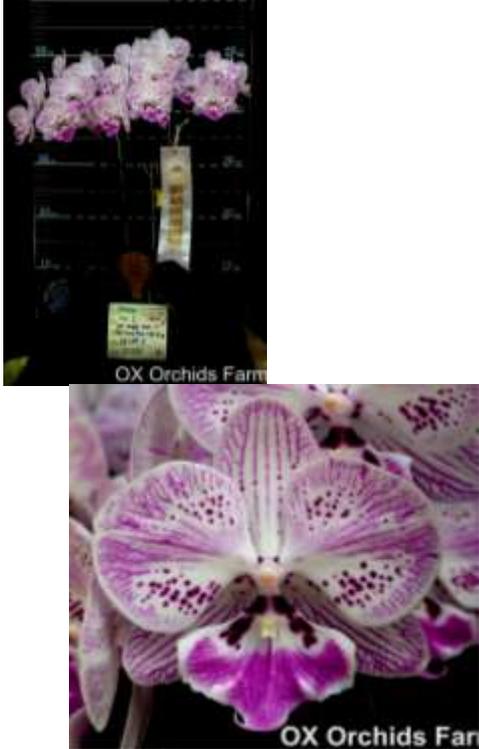

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. OX Happy Honey Moon 'OX1749' (OX Happy Girl x OX Crescent)</p> <p>Top quality "big lip" harlequins are difficult to find, especially when they carry a solid contrasting "big lip" to set the whole flower off ! This particular clone produces generous cascades of 8cm (3") flowers showing the influence of its pollen parent for the bold solid-colored lip and its pod parent for the harlequin influence on its petals and accenting the lip. Its lip is tucked right into the flower, leaving no gap between it & its lateral sepals. Too often we've seen this line of breeding show a "big lip" that drops way down before opening out, making for an awkward and unpleasing presentation when the lip should be the focus. And we do love this solid dark pink lip with a white picotee & harlequin moustache which contrasts boldly against the white background of its flowers !</p> <p style="text-align: center;">BIG LIP HYBRID ! OX NURSERY, TAIWAN</p>	<p style="text-align: center;">PF (1)</p>	<p style="text-align: center;">\$ 28 August Special: \$ 18</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. OX Honey Moon 'OX1677'</p> <p style="text-align: center;"><i>(OX Honey x Yu Pin Easter Island)</i></p> <p><i>Phal. Yu Pin Easter Island has bred some sensational "big lip" hybrids & OX Honey Moon is no exception ! Fully round flat 8.3cm (3") white flowers are beautifully finished with a broad flat "big lip" heavily flushed with rich pink, edged with a charming white picotee. Gracefully cascading spikes present each flower perfectly spaced for the ultimate impact. Our newest "big lip" with what we consider to be essential from this line of breeding ~ a lip that's open & broad, tucked right up into the flower with no gap showing through the lateral sepals ~ a lip that's truly resembling a third petal !</i></p> <p style="text-align: center;">OX NURSERY, TAIWAN</p>	<p style="text-align: center;">PF (1)</p> <p style="text-align: center;"><i>Last of our stock</i></p>	<p style="text-align: center;">\$ 38 August Special: \$ 28</p>
	<p style="text-align: center;">Phal. OX Moon Island 'OX1766'</p> <p style="text-align: center;"><i>(OX Honey Moon x Fuller's AN-Plus)</i></p> <p><i>A beautiful new BIG LIP hybrid that we just found at OX Nursery ! What we like about this particular hybrid is the nice flat broad lip coming from both parents and the soft "cherry blossom" color of its 8.7cm (3.5") flowers ~ add to that its beautiful round form with the petals almost touching. You can readily see the OX Honey Moon parent in its beautiful broad 'Big Lip'. The newest addition to our BIG LIP Collection !</i></p> <p style="text-align: center;">BIG LIP HYBRID ! OX NURSERY, TAIWAN</p>	<p style="text-align: center;">SP (4) 1-2 spikes</p> <p style="text-align: center;">PF (3)</p> <p style="text-align: center;">NEW LISTING</p>	<p style="text-align: center;">\$ 38</p> <p style="text-align: center;">\$ 33 August Special: \$ 28</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. OX Sunkist 'OX1637' AM/AOS</p> <p style="text-align: center;"><i>(Surf Song x Yu Pin Fireworks)</i></p> <p><i>Seen & awarded at a recent TIOS Show in Taiwan, this clone had everything going for it – so we ordered as many as we could ! Added to the amazing sunset color from Surf Song comes the BIG LIP from Yu Pin Fireworks, making for an arresting display of a tri-petal flower, around 3" in size. What we really liked about this particular clone was the flatness of the lip as opposed to many "big lip" clones we've seen that are showing a severely cupped lip, something we just don't like to see for this line of breeding...this one truly gives the appearance of three petals on a nice flat flower.</i></p> <p style="text-align: center;">BIG LIP HYBRID ! 	<p>Phal. Taida Pride Cupid ' #1' <i>(Sogo Pride x Tying Shin Cupid)</i></p> <p><i>What a great result from two proven parents ! The pod parent, Sogo Pride, is a waxy novelty brilliant yellow. Combined with Tying Shin Cupid, a waxy multi-floral mini orange, it has produced this fabulous miniature version of the great sunset-tone Phal. Sogo Lawrence with great compact leaf spans & a great flower count for this type of breeding. Long- lasting waxy flowers which branch readily when fully mature !</i></p> <p>LIGHTLY FRAGRANT ! WAXY MULTI-FLORAL MINI</p>	<p>PF (1)</p> <p>NEW LISTING</p>	<p>\$ 35 August Special: \$ 28</p>
	<p>Phal. Valentinii <i>(violacea fma. indigo x cornu-cervi fma. chattaladae)</i></p> <p><i>We've been knocked over by the vigor of this primary hybrid, with each plant producing 2-3 spikes in just 2.7" pots as first bloomers ! This remake of the hybrid has taken advantage of two new richly colored forms of its species parents, the dark indigo-blue form of Phal. violacea and the deep solid red of the chattaladae form of Phal. cornu-cervi, creating solid red waxy flowers on ever-blooming spikes. As is the case with its species parents, previously flowered spikes can remain green so don't remove them. They will add more buds in season in addition to producing even more spikes. A fully mature plant can be surrounded with a flaming blaze of red glory !</i></p> <p>FRAGRANT WAXY NOVELTY ! ONE-OF-A-KIND SEEDLINGS</p>	<p>SP/B/F 2-3 spikes</p> <p>BRAND NEW !</p>	<p>\$ 48</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Yungho Gelb Passion <i>(Yungho Gelb Nosa x Hannover Passion)</i></p> <p><i>Carrying the potential to produce solid red flowers, this new hybrid is just loaded with waxy fragrant species in its breeding background ! The resulting progeny will span the range from soft to rich yellow, heavily suffused to an almost solid red as a result of the rich red barring from their species heritage ~ some may be so heavily overlaid with red barring as to appear solid red. We're guessing they will be fragrant due to their richly fragrant parentage but cannot guarantee it.</i></p> <p style="text-align: center;">WAXY NOVELTY !</p> <p style="text-align: center;">ONE-OF-A-KIND PLANTS</p>	<p style="text-align: center;">BS (2)</p> <p>BRAND NEW !</p> <p><i>These will only be brought to shows for Pre-Orders</i></p>	<p style="text-align: center;">\$ 75</p>

LARGE-FLOWERED (CLASSIC) PHALAENOPSIS HYBRIDS (including large-flowered Harlequins):

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p style="text-align: center;">Phal. Green Earth 'YO54' <i>(Tarragone x Orchid World)</i></p> <p><i>Yes, it's really GREEN ! Large soft lime green flowers are beautifully shingled on strong cascading inflorescences, the flowers taking after the classic white Tarragone parent at 4+'' in size. Phal. Orchid World has added a heavier substance and the lime green color to the flower with Phal. Tarragone dominating for its classic shape, presentation, spike height & floriferousness. A great new clone from cutting-edge breeding of a classic-type Phal. at its best !</i></p>	<p style="text-align: center;">PF (2)</p> <p>4'' pot</p> <p>NEW LISTING</p>	<p style="text-align: center;">\$ 38</p>

PHOTO	NAME & DESCRIPTION	SIZE	PRICE
	<p>Phal. OX Firebird 'OX1506'</p> <p><i>(OX Black Jack x Walnut Valley Halo)</i></p> <p>One of the most dramatic of the newest generation of Harlequin breeding ! Consistent patterning from one flower to the next with only slight variations in intensity according to light and temperature – large flowers are produced on readily branching & gracefully cascading spikes. This one will draw your eye from any part of a room !</p> <p>NEW HARLEQUIN !</p> <p>FROM OX NURSERIES, TAIWAN</p>	<p>BS (PF)</p> <p>4" pot</p> <p>(3)</p> <p>NEW LISTING</p>	<p>\$ 38</p>
	<p>Phal. OX Golden Apple 'OX1595' AM/AOS</p> <p><i>(Fusheng Sweet Paradise x OX Spot Queen)</i></p> <p>Just awarded at the Taiwan International Orchid Show, this is an outrageous new novelty-size harlequin with stable & unique patterning which is consistent from one flower to the next ! This is the only clone from this cross that has been dominant for its harlequin heritage. Non-fading golden yellow flowers, 9cm (3.5") in size, are kissed with a touch of white around their harlequin-haloed column, with the harlequin patterning radiating out & leaving a narrow yellow picotee around all the segments. Beautifully finished with a bold ruby-red lip, this clone from OX Nurseries took on the best of both parents producing a flower totally different from the rest of this hybrid's progeny. A must for the newest in larger flowering yellow harlequin breeding !</p> <p>OX NURSERY, TAIWAN</p>	<p>B/F</p> <p>(2)</p>	<p>\$ 28</p>

	<p style="text-align: center;">Phal. OX Golden Lottery 'OX1665' FCC/AOS</p> <p style="text-align: center;"><i>(OX Lottery x OX Golden Star)</i></p> <p><i>When we awarded this clone of OX Golden Lottery two years ago at the Taiwan Show, it was the most outrageous splash-petal yellow we had ever seen ! And that still holds true today ~ we have yet to see this kind of breeding produce anything even close to this. Producing flowers almost 4" in size, when awarded it was showing off with 34 superbly formed & sparkling non-fading flowers on two branching inflorescences. In addition to receiving the highly coveted FCC/AOS, it also was awarded by the IPA as Best Phalaenopsis in Show from over 500 entries !</i></p> <p><i>SPECIAL NOTE ON THIS CLONE:</i> <i>The first group of these that we brought in flowered as OX Lottery 'OX1525'. We were told by OX that their first run clones had all reverted to the OX Lottery parent, the result of an unstable cloning, & suggested that we flower our second shipment, a later cloning done to stabilize the results. So far we have flowered only 4 plants from that second group that are true to OX Golden Lottery 'OX1665'. And when flowered under cooler brighter winter conditions, their splash patterning will become even more concentrated & intense, just like the plant we awarded which was flowering in Taiwan during March, which in Taiwan is a time of cooler brighter growing conditions.</i></p> <p style="text-align: center;"><i>OX NURSERY, TAIWAN</i></p>	<p style="text-align: center;">PF (2)</p> <p style="text-align: center;"><i>BRAND NEW !</i></p> <p style="text-align: center;"><i>These will only be brought to shows for Pre-Orders ~ these are true to the awarded FCC/AOS parent!</i></p>	<p style="text-align: center;">\$ 75</p>
	<p style="text-align: center;">Phal. OX Prince 'OX1480' AM/AOS</p> <p style="text-align: center;"><i>(OX Black Jack x Leopard Prince)</i></p> <p><i>Seen & awarded at the 2014 Taiwan International Orchid Show, this particular clone of OX Prince displayed 12 full round flowers on a single branching inflorescence ! Firm substance on its 4+'' flowers adds to the longevity of its satiny display. Harlequin-influenced spotting over its white background makes quite a dramatic statement !</i></p> <p style="text-align: center;"><i>OX NURSERY, TAIWAN</i></p>	<p style="text-align: center;">B/F (3) 4" pot</p>	<p style="text-align: center;">\$ 42</p>

this line of breeding we leave any still-green spikes on the plants since they will most likely add more buds to these spikes in addition to producing new spikes at their next flowering. Some people choose to remove the initial spikes & give the energy back to the plant. However, we've never noticed (with this line of novelty-type breeding) that it makes much difference in the overall vigor of the plant since their breeding background carries the tendency to retain older spikes. Also, with this kind of breeding, flower form, color and size improve enormously with their 2nd & 3rd flowerings. But ~ the real bonus to owning a One-of-a-Kind plant is that you can give it your own clonal name !

FRAGRANT MINIATURE CHINESE CYMBIDIUMS:

*All the species listed below grow & flower easily WITH our Phals under the same light & **WARMER** temperature conditions since they are miniature growing Chinese species, requiring much lower light, less space & will grow under warmer temperatures than their larger cousins ~ they also don't require the extreme chill of standard Cymbidiums in order to make their flower spikes and all tend to flower more than once a year, having no definite flowering season. One of these clones, 'Tian Cao', is just 6" in height – perfect for windowsill & under-lights growing !*

We are particularly fond of the green & yellow flowering varieties with either delightfully compact or elegantly tall flower spikes. We've found that the traditional pale pink-burgundy colored flowers are just too muddy to stand out and make a statement.

*The clone 'Tian Cao' also has the added charm of **VARIEGATED FOLIAGE**, meaning it's attractive, even when not in flower ! Variegated foliage comes at a higher price because it's greatly prized in Japanese & Chinese cultures, meaning the stronger the variegation, the more expensive the clone.*

MINIATURE VANDACEOUS:

All these species & hybrids grow & flower easily WITH our Phals under the same light & temperature conditions since they are miniature growers, requiring much lower light than their larger-growing & flowering cousins. We're growing them in deep small plastic baskets to allow their roots to dry slightly between waterings. In the winter we slip these little baskets into rose pots to allow the roots to continue to grow down from the basket, our own approach to "collaring" that Alan Koch of Gold Country Orchids does with his plants in clay pots. These are mostly miniature, & a few compact, growing species & hybrids, many of which will readily form basal keikis to become beautiful specimen miniatures producing multitudes of spikes at the same time on all of their mature growths. And most of them are also delightfully FRAGRANT !

	<p style="text-align: center;">Den. laevifolium <i>(Miniature Species)</i></p> <p><i>Just laden with multitudes of brilliant deep electric pink buds & flowers, this mini-miniature Dendrobium species thrives under Phalaenopsis conditions ! And this particular sib cross has been producing electric rich pink flowers in multitudes. It's flowers glow with glossy color & have much heavier substance than average for a Dendrobium species which equates to a much longer flowering. An easy grower & great space saver, its long-lasting flowers provide a display that can last for weeks. Its mature canes will go deciduous, at which point the buds emerge from the apex of each newly matured deciduous cane. Reduce watering & fertilizer only slightly after flowering until new flowering growths are initiated.</i></p> <p style="text-align: center;">MINI MINIATURE !</p> <p style="text-align: center;">ONE-OF-A-KIND SPECIES SEEDLINGS</p>	<p>PF (1)</p> <p><i>New growths just initiating</i></p> <p style="text-align: center;">NEW LISTING</p>	<p style="text-align: center;">\$ 33</p> <p style="text-align: center;">August Special:</p> <p style="text-align: center;">\$ 22</p>
	<p style="text-align: center;">Den. Ueang Pheung <i>(jenkinsii x lindleyi)</i></p> <p><i>The particular charm of this FRAGRANT MICRO MINI is that while it retains the miniature leaf habit of Den. jenkinsii, it took on the greater floriferousness of Den lindleyi, producing multitudes of large flowers on cascading spikes, producing more flowers and buds than Den. jenkinsii's habit of 2-4 flowers per spike. Will flower any time, fall to spring, on its newly maturing growths !</i></p> <p><u>NOTE:</u> <i>We've found this little hybrid does equally well whether grown in moss or a bark mix – and it readily makes the transition from moss to bark without missing a beat.</i></p> <p style="text-align: center;">FRAGRANT MICRO MINI !</p> <p style="text-align: center;">ONE-OF-A-KIND HYBRID SEEDLINGS !</p> <p style="text-align: center;">GENEROUS MULTIPLE GROWTH PLANTS</p>	<p>PF (3)</p> <p style="text-align: center;">NEW LISTING</p>	<p style="text-align: center;">\$ 28</p>

PAPHIOPEDILUMS:*

Many of our Paphiopedilums are divisions of select plants from our collection ~ and are growing and flowering under the same conditions as our Phalaenopsis. Our particular favorites are miniatures from the parvi family, especially those with micranthum, armeniacum & delenatii as parents, and the larger growing, always grand & showy multiflorals, using philippinense or rothschildianum as parents. Pricing will vary according to the number of growths of each division/plant. Number of growths for each provided on request.

	<p style="text-align: center;">Bulb. falcatum fma. velutina 'Gold Country' CCE/AOS</p> <p style="text-align: center;"><i>(RARE COLOR FORM of</i> <i>MICRO-MINI Species)</i></p> <p><i>Endemic to Ghana & the Ivory Coast, this hot to warm growing species is the more rare DEEP RICH BURGUNDY-RED color form of this easy-growing species ! Producing a slightly longer inflorescence than other forms of this species, its many yellow-based flowers are so heavily suffused with red-purple spots as to appear solid red, flowering successively along an 11" inflorescence, usually late winter to early spring. Best grown under shady Phalaenopsis conditions, we've found this as easy a grower as other forms of Bulb. falcatum with the added punch of its deep burgundy-red color. Readily grows to specimen size !</i></p> <p style="text-align: center;">MICRO-MINIATURE !</p> <p style="text-align: center;">DIVISIONS FROM OUR AWARDED MOTHER PLANT</p>	<p style="text-align: center;">BS (3)</p> <p style="text-align: center;"><i>Multi-growth plants</i></p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 38</p>
	<p style="text-align: center;">Bulb. lasiochilum</p> <p style="text-align: center;"><i>(MICRO-MINI Species)</i></p> <p><i>Endemic to Myanmar, Thailand and Malaysia, this miniature produces growths only up to 3" in height ! It flowers from summer into the fall with umbels of 1-4 3.1cm (1.25") flowers on inflorescences held just above the foliage, each flower producing a strawberry fragrance. Although we're growing these in small net pots, due to their growth habit of widely spaced pseudobulbs many choose to grow them mounted. Easily grown & flowered under Phalaenopsis conditions of partial shade and warmth, they like to be kept evenly moist but with good drainage & air circulation. A great miniature with a pleasing fragrance (for Bulbophyllums!) these are easily tucked into any collection, perfect for windowsill, under lights or terrarium growing !</i></p> <p style="text-align: center;">MICRO-MINIATURE !</p>	<p style="text-align: center;">NBS (3)</p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 18</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;">Bulb. sumatranum (<i>MINI</i> Species)</p> <p><i>Endemic to Thailand, Malaysia, Sumatra & Borneo, this warm to intermediate growing mini can produce flowers up to 3" in size, almost dwarfing its foliage ! The spikes emerge from the base of the pseudobulbs, each producing a single flower with a wonderful hinged lip. An easy grower, it does very well under Phalaenopsis light & temperature conditions with good drainage & high humidity. We're growing these in small mesh baskets in New Zealand moss to help keep them moist during their growing season. Great for terrarium growing !</i></p> <p style="text-align: center;">MINI !</p>	<p>NBS (3)</p> <p>NEW !</p>	<p>\$ 25</p>
 	<p style="text-align: center;">Dendrochilum uncatum (Syn. formosanum)</p> <p>(<i>FRAGRANT MINIATURE</i> Species)</p> <p><i>Wonderfully miniature yet capable of putting on quite a show with a multitude of cascading sprays bearing petite ¼ - ½" lime green flowers ! Best grown in New Zealand sphagnum moss, kept damp, not wet. Happily grown under Phalaenopsis conditions. The fully mature plant pictured to the left is in just a 4" pot standing a mere 6-8" in height. These little wonders have already flowered once with multiple spikes & can flower both fall and spring, depending on newly maturing growths.</i></p> <p style="text-align: center;">FRAGRANT MINI !</p> <p style="text-align: center;">ONE-OF-A-KIND SPECIES SEEDLINGS</p>	<p>PF (2)</p> <p><i>Each plant already has flowered with 6-8 spikes !</i></p> <p><i>Multi-growth plants</i></p> <p>NEW !</p>	<p>\$ 28</p>

	<p style="text-align: center;">Dendrochilum wenzelii 'Fishing Creek' CCM/AOS</p> <p style="text-align: center;">NOTE: FALL FLOWERING FORM</p> <p style="text-align: center;">(FRAGRANT MINIATURE Species)</p> <p><i>Endemic to the Philippines, this is another great miniature Dendrochilum producing multitudes of blazing red-orange <u>flowers in the fall</u> as opposed to most clones of this species which flower in the spring ! A vigorous grower alongside Phalaenopsis, this clone seems to easily double in size each year. Attractive upright narrow grass-like foliage produces inflorescences just packed with multitudes of flowers.</i></p> <p><i>Divisions from our original mother plant !</i></p> <p style="text-align: center;">FRAGRANT MINI !</p> <p style="text-align: center;">DIVISIONS FROM OUR AWARDED MOTHER PLANT</p>	<p style="text-align: center;">PF (2)</p> <p style="text-align: center;">NEW !</p>	<p style="text-align: center;">\$ 42</p>
	<p style="text-align: center;">Fredclareara After Dark 'Sunset Valley Orchids' FCC/AOS</p> <p style="text-align: center;"><i>(Mo. Painted Desert x Ctsm. Donna Wise)</i></p> <p><i>Easily grown under Phalaenopsis conditions, this particular clone of Fredclareara After Dark produces tawny green flowers, heavily spotted maroon over all ! Its heavy substance flowers with a waxy texture lead to a long-lasting display. In 2005 this plant was the recipient of the Merritt W. Huntington Award as the most outstanding plant that had been granted an FCC/AOS. When awarded with its FCC, it was vigorously displaying 48 flowers on three pendant inflorescences, all emerging from just one pseudobulb ! A great exhibit plant and a stunner when in flower. These plants are now just completing their new leafy growths in preparation for fall/winter flowering.</i></p> <p><u>Of special note:</u> <i>We shifted our exhibit plants of Fredclareara into New Zealand moss as an experiment to keep the deciduous growths plump & have noted that its even moisture supply helps keep the older pseudobulbs from desiccating while giving increased vigor to the new growths. We have since moved all our stock of this type into NZ Moss & they're thriving !</i></p>	<p style="text-align: center;">PF 4" pots (2)</p> <p style="text-align: center;">Large multiple growth plants</p>	<p style="text-align: center;">\$ 45</p>

	<p style="text-align: center;">Galeopetalum Starburst 'Parkside' AM/AOS</p> <p style="text-align: center;"><i>(Galeottia fimbriata x Zygo. Jumpin Jack)</i></p> <p><i>We can't say enough about this amazing new hybrid ! A great intergeneric Zygopetalum hybrid bearing large rich waxy GREEN flowers, accented with burgundy-brown barring and a broad brilliant burgundy-pink waterfall patterned lip. An easy-grower alongside Zygo. Advance Australia, under Phalaenopsis conditions, these plants make quite a statement with their dramatically large, colorful & delightfully fragrant flowers !</i></p> <p style="text-align: center;">AMAZINGLY FRAGRANT !</p>	<p>PF (3) 4" pots</p> <p style="text-align: center;">NEW LISTING</p>	<p>\$ 38</p>
	<p style="text-align: center;">Habenaria carnea (<i>'Mem. Ruffles' AM/AOS x outcross</i>)</p> <p style="text-align: center;"><i>(Species)</i></p> <p><i>Endemic to Thailand, this charming soft pink to salmon Habenaria also has dramatically spotted leaves, adding to its charm even when not in flower ! This particular sibbing was bred by Leon Glicenstein for its fuller form & larger flowers. Blooming begins in late summer with its terminal upright inflorescence carrying up to 15 wide-lip flowers per leafed-out corm or tuber. Flower size can reach up to 2" on a fully mature growth making it quite showy. A warm grower under Phalaenopsis conditions, follow our culture suggestions (below) for all Habenarias, & you'll be amazed how easy they are to grow & flower !</i></p> <p style="text-align: center;">MICRO-MINIATURE !</p>	<p>PF (1)</p> <p><i>These plants are finally up & thriving !</i></p> <p style="text-align: center;">BRAND NEW !</p> <p><i>These will only be brought to shows for Pre-Orders</i></p>	<p>\$ 65</p>

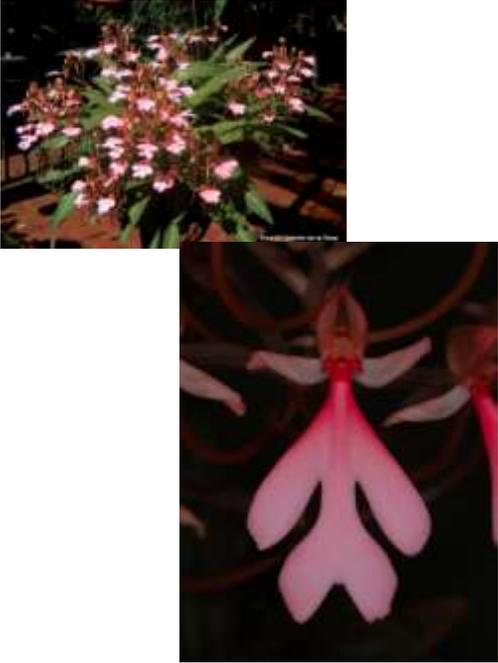

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;">Habenaria erichmichaelii (Species)</p> <p><i>One of the earliest to flower of Habenaria species, this miniature is often confused with Habenaria rhodocheila, yet is distinctly different in its flowers and foliage ! This species has a short stature bearing leaves with silvery-white spots. Its short erect 6" spike can carry 2-6 silvery-pink glowing flowers. Easily grown & flowered with Phalaenopsis, we've found they do extremely well grown in New Zealand moss by following the same culture as for Regnieri and rhodocheila (see below). A new species just recently discovered, endemic to China, Thailand and Malaysia !</i></p> <p style="text-align: center;">MICRO-MINIATURE !</p>	<p>PF (3)</p> <p><i>These plants are finally up & thriving !</i></p> <p><i>These will only be brought to shows for Pre-Orders</i></p>	<p>\$ 65</p>
	<p style="text-align: center;">Habenaria Regnieri (carnea x rhodocheila)</p> <p><i>A fabulous mating of two great species of Habenaria, many clones of which have been recognized with AOS awards ! Its beautiful silver-green spotted pattern on the wavy green leaves make this plant attractive, even when not in flower – and its compact growth habit allows it to fit readily into any collection. Large flowers are produced in the fall from the new spring growths bearing stunning salmon-pink flowers, creating up to 22 flowers on each inflorescence, the flower size being about 1 1/4". These plants are also benefitting from great hybrid vigor as a result of the mating of two species. Like our comments below on growing Habenaria rhodocheila, we follow the same culture for this little hybrid – and it, too, loves growing in New Zealand Moss ! Not available for the last two years, we were recently fortunate enough to obtain a few more from Taiwan.</i></p> <p style="text-align: center;">MINIATURE !</p>	<p>PF (3)</p> <p><i>These plants are finally up & thriving !</i></p> <p><i>These will only be brought to shows for Pre-Orders</i></p>	<p>\$ 48</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;">Habenaria rhodocheila (Species)</p> <p><i>We have been amazed at how easy to grow this Habenaria species has been ! Even when not in flower, their foliage is beautifully marked. We've found that if we keep them just slightly moist with a light spritzing, not wet, when they go deciduous, they produce their spring growths readily. Allowing them to dry totally will most likely cause their loss over the winter – we know, we used to follow the culture sheets & did just that – and they never came back ! We've also discovered that trying to grow them in a bark mix is more than challenging, so we've switched to growing them in moss. This population has been extremely vigorous & is well worth adding to every collection. Plus, despite our initial doubts, they LOVE growing in the New Zealand moss ! We've been amazed at how really easy Habenarias are to grow & flower – just don't follow any of the culture sheets & you'll do great !</i></p> <p><i>Being seedlings, not mericlones, there will be a very slight color variation from one seedling to the next.</i></p> <p style="text-align: center;">MINIATURE !</p>	<p style="text-align: center;">PF</p> <p><i>These plants are finally up & thriving !</i></p> <p><i>These will only be brought to shows for Pre-Orders</i></p>	<p style="text-align: center;">\$ 42</p>
	<p style="text-align: center;">Habenaria xanthocheila (Species)</p> <p><i>Another great Habenaria species bearing glowing bright yellow flowers ! These are small growing terrestrials with coral-like roots. In Malaysia they are found growing exposed on granite boulders. Produces beautiful erect inflorescences earlier than many other Habenaria species. Also, unlike other Habenarias, this species appears to have little serrations on its flower segments which add to its charm.</i></p> <p style="text-align: center;">MINIATURE !</p>	<p style="text-align: center;">PF (1)</p> <p><i>These plants are finally up & thriving !</i></p> <p style="text-align: center;">BRAND NEW !</p> <p><i>This will only be brought to shows for Pre-Orders</i></p>	<p style="text-align: center;">\$ 95</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p>Onc. (Gomesa) Moon Shadow 'Tiger Tail' AM/AOS <i>(Cytocidium Hornet x Big Bee)</i></p> <p><i>We've always loved the brilliant yellow flowers of Onc. (Gomesa) varicosa, especially with its boldly contrasting deep chocolate petals ! However, under our growing conditions that particular species never did well at all. This little hybrid has lots of Onc. varicosa in its breeding background that it looks just like Onc. varicosa, yet it is infinitely easier to grow & flower under our Phalaenopsis conditions. Vigorously branching cascading spikes over miniature growths make this clone a sure winner !</i></p> <p>MINIATURE !</p>	<p>PF (2)</p> <p><i>Fully mature multiple-growth plants</i></p> <p>NEW LISTING</p>	<p>\$ 28</p>
 <p><i>Our awarded plant ~ the flower is so glossy that the flash is reflecting back ! Sepals & petals have a green base but are so heavily overlaid with dark burgundy that they appear solid in color.</i></p>	<p>Propetalum La Jolla Delight 'Hilo Orchid Farm' AM/AOS <i>(Promenaea stapelioides x Zygo. Kiwi Dusk)</i></p> <p>JUST AWARDED !</p> <p><i>We just had our plant of this clone awarded an AM/AOS at the MontrealExpo Show this March ! An enormous improvement over prior makes of this hybrid, due in large part to the dark & heavily suffused clones of its parents. A wonderfully compact grower, standing just 8-10" in height, these plants will grow happily under low to medium light, right next to Phalaenopsis, and their waxy flowers can last for weeks. They can flower any time of the year in response to the onset of new growths, & we've had several flower twice within just two months so they have no particular flowering season ! They will grow equally well under intermediate temperatures although we grow them just a bit warmer with our Phalaenopsis. Keep moist to help maintain their plump pseudobulbs but do not allow the medium to become soggy.</i></p> <p>FRAGRANT MINIATURE !</p>	<p>BS</p> <p><i>Vigorous multiple-growth plants</i></p> <p>NEW LISTING</p>	<p>\$ 38</p>

PHOTO	NAME & NOTES	SIZE	PRICE
	<p style="text-align: center;">Psychopsis Mendenhall 'Hildos' FCC/AOS</p> <p style="text-align: center;"><i>(Butterfly x papilio)</i></p> <p><i>Producing stately inflorescences of "butterfly-like" 5" flowers, this hybrid will continue to add buds to each spike it creates, sometimes for as long as seven years ! A well-grown plant can produce over 20 inflorescences & create a spectacular display. These plants will easily spike for the first time in just 3" pots. They resent being repotted so we always just shift the entire root ball, bark included, to the next larger size & fill in around the perimeter with fresh bark mix. They also don't mind getting a little dry between waterings. An easy, forgiving & showy grower & bloomer, even under lower light Phalaenopsis conditions.</i></p>	<p>BS (3)</p> <p>4" pots</p> <p>Multiple growth large plants</p> <p>NEW LISTING</p>	<p>\$ 42</p>
	<p style="text-align: center;">Soph. cernua</p> <p style="text-align: center;"><i>(Micro-Mini Species)</i></p> <p style="text-align: center;">Possible 4N (tetraploid) population !</p> <p><i>An absolutely adorable micro-miniature species from the Cattleya alliance ! Easily grown in small spaces under Phalaenopsis conditions, this little species can flower several times a year on multi-growth plants. When their leaves are showing a darker burgundy-red rim, they are getting the maximum amount of light. These are growing in net pots since they like to dry slightly between watering. Avoid keeping them too moist in the winter by just lightly watering the surface of the pot rather than thoroughly drenching them. Ideal for under-lights, windowsill & space-challenged growing !</i></p> <p style="text-align: center;">MICRO-MINI !</p>	<p>BS (2)</p> <p>NEW LISTING</p>	<p>\$ 38</p>
